The Geological Society of America Bulletin
Subject Index to Volume 90, No. 1-12, 1979

absolute age *see also* geochronology; isotopes

absolute age—dates

biotite: Igneous origin of the orbicular rocks of the Sandia Mountains, New Mexico
(Enz, R. D., *et al.*) 2: I 138-140, II 349-380

corals: Uranium-series dating of the Pleistocene reef tracts of Barbados, West Indies
(Bender, M. L., *et al.*) 6: I 577-594

granite: Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195

hornblende: Ages of deposition, deformation, and intrusion of Cretaceous rocks, eastern St. Croix, Virgin Islands
(Speed, R. C., *et al.*) 7: I 629-632

minerals: Early Tertiary "Incaic" tectonism, uplift, and volcanic activity, Andes of central Peru
(Noble, D. C., *et al.*) 10: I 903-907

— Geology and structure of the central Ruby Range, Madison County, Montana
(Garihan, J. M.) 4: I 323-326, II 695-788

peat: Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628

sediments: Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215

shells: Black Shell turbidite, Hatteras abyssal plain western Atlantic Ocean
(Elmore, R. D., *et al.*) 12: I 1165-1176

— Relict oysters on the United States Atlantic continental shelf; a reconsideration of their usefulness in understanding late Quaternary sea-level history; discussion and reply
(Emery, K. O., *et al.*) 7: I 689-694

soils: Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California
(Ku, T. L., *et al.*) 11: I 1063-1073

volcanic rocks: Geology and petrology of the McMurdo Volcanic Group at Rainbow Ridge, Brown Peninsula, Antarctica
(Kyle, P. R., *et al.*) 7: I 676-688

— K-Ar geochronology of Oligocene volcanic rocks, Davis and Barrilla mountains, Texas
(Parker, D. F., *et al.*) 12: I 1100-1110

— Quaternary stratigraphy and chronology of Mauna Kea, Hawaii; a 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation
(Porter, S. C.) 7: I 609-611, II 980-1093

— The record of Cenozoic volcanism around the Gulf of California
(Gastil, G., *et al.*) 9: I 839-857

zircon: Origin and emplacement of the Academy Pluton, Fresno County, California
(Mack, S., *et al.*) 4: I 321-323, II 633-694

— U-Pb geochronology of exposed basement rocks in Oklahoma
(Bickford, M. E., *et al.*) 6: I 540-544

absolute age—interpretation

basalt: New K-Ar dates and the late Pliocene to Holocene geomorphic history of the central Rio Grande region, New Mexico; discussion
(Stearns, C. E.) 8: I 799-800

pitchblende: Interpretation of lead-uranium ages of pitchblende deposits in the central Front Range, Colorado
(Phair, G.) 9: I 858-870

Aegean Sea—tectonophysics

plate tectonics: Aegean and surrounding regions; complex multiplate and continuum tectonics in a convergent zone
(Dewey, J. F., *et al.*) 1: I 84-92

Africa *see also* Botswana; Egypt; Ghana; Niger; Nigeria; Sahara; South Africa; Tunisia

Africa—structural geology

tectonics: Geologic structure and evolution of the Keta Basin, West Africa; discussion and reply
(Hastings, D. A., *et al.*) 9: I 889-892

Africa—tectonophysics

plate tectonics: Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083

Alabama—oceanography

sedimentation: Hydraulic differentiation of heavy minerals, offshore Alabama and Mississippi
(Drummond, S. E., *et al.*) 9: I 806-807, II 1429-1457

Alaska—geomorphology

shore features: Barrier island development along the Alaskan-Yukon coastal plains; summary
(Short, A. D.) 1: I 3-5, II 77-103

Alaska—oceanography

continental shelf: Modern biogenic gas-generated craters (sea-floor "pockmarks") on the Bering Shelf, Alaska
(Nelson, H., *et al.*) 12: I 1144-1152

Alaska—stratigraphy

Tertiary: Paleomagnetic data from the Alaska Peninsula
(Stone, D. B., *et al.*) 6: I 545-560

Alaska—tectonophysics

plate tectonics: Cross section, Alaska Peninsula-Kodiak Island-Aleutian Trench
(von Huene, R., *et al.*) 5: I 427-430

— Subduction of the Kula Ridge at the Aleutian Trench; discussion and reply
(Farrar, E., *et al.*) 7: I 699-702

Alberta—economic geology

petroleum: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982

Alberta—sedimentary petrology

reefs: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982

algae—nannofossils

Eocene: Middle Eocene pelagic microfossils from the Nazca Plate
(Coulbourn, W. T., *et al.*) 7: I 634-650

Andes—structural geology

tectonics: Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280

Andes—tectonophysics

plate tectonics: Early Tertiary "Incaic" tectonism, uplift, and volcanic activity, Andes of central Peru
(Noble, D. C., *et al.*) 10: I 903-907

— Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012

angiosperms—Dicotyledoneae

Holocene: Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region; discussion and reply
(Everitt, B. L., *et al.*) 12: I 1183-1184

Antarctica—petrology

igneous rocks: Geology and petrology of the McMurdo Volcanic Group at Rainbow Ridge, Brown Peninsula, Antarctica
(Kyle, P. R., *et al.*) 7: I 676-688

Appalachians—geomorphology

solution features: Quantitative morphology of landforms in carbonate rock basins in the Appalachian Highlands
(White, E. L., *et al.*) 4: I 385-396

Appalachians—paleontology
Pisces: Drainage evolution and fish dispersal in the central Appalachians
(Hocutt, C. H.) 2: I 129-130, II 197-234

Appalachians—petrology
igneous rocks: Origin of the plutonic mafic rocks of southern Nova Scotia
(de Albuquerque, C. A. R.) 8: I 719-731

Appalachians—stratigraphy
Mississippian: Use of scintillometer and gamma-ray logs for correlation and stratigraphy in homogeneous black shales
(Ettensohn, F. R., *et al.*) 5: I 421-423, II 828-849

Appalachians—structural geology
deformation: Deformation at various scales in the South Mountain Anticlinorium of the central Appalachians
(Mitra, S.) 3: I 227-229, II 545-579
— Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
tectonics: Similarities between the thick-skinned Blue Ridge anticlinorium and the thin-skinned Powell Valley Anticline
(Harris, L. D.) 6: I 525-539
— The Taconides of western New Jersey; new evidence from the Jutland Klippe; summary
(Perissoratis, C., *et al.*) 1: I 10-13, II 154-177

Appalachians—tectonophysics
plate tectonics: Magnetic and chemical variations of Mesozoic diabase dikes from eastern North America; evidence for a hotspot in the Carolinas?
(de Boer, J., *et al.*) 2: I 185-198

Arabian Peninsula *see also* Saudi Arabia

archeology *see* archaeology *under* biogeography *under* fossil man

Argentina—structural geology
structural analysis: Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280
tectonics: Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012

Arizona—structural geology
neotectonics: Holocene faulting in the western Grand Canyon, Arizona; discussion and reply
(Anderson, R. E., *et al.*) 2: I 221-224
tectonics: Origin and provenance of some exotic blocks in lower Mesozoic red-bed basin deposits, southern Arizona
(Davis, G. H., *et al.*) 4: I 376-384

Arkansas—areal geology
Ouachita Mountains: Geologic map and cross section, eastern Ouachita Mountains, Arkansas; map summary
(Viele, G. W.) 12: I 1096-1099

Arthropoda—Crustacea
Holocene: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

Asia *see also* Himalayas; India; Iran

Atlantic Coastal Plain—stratigraphy
changes of level: Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215
— Relict oysters on the United States Atlantic continental shelf; a reconsideration of their usefulness in understanding late Quaternary sea-level history; discussion and reply
(Emery, K. O., *et al.*) 7: I 689-694
— Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628

Atlantic Ocean *see also* Azores

Atlantic Ocean—geophysical surveys
seismic surveys: Evolution of the Sao Paulo Plateau (southeastern Brazilian margin) and implications for the early history of the South Atlantic
(Kumar, N., *et al.*) 3: I 281-293

Atlantic Ocean—oceanography
continental shelf: Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628
sedimentation: Black Shell turbidite, Hatteras abyssal plain, western Atlantic Ocean
(Elmore, R. D., *et al.*) 12: I 1165-1176
— Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288

Atlantic Ocean—stratigraphy
changes of level: Relict oysters on the United States Atlantic continental shelf; a reconsideration of their usefulness in understanding late Quaternary sea-level history; discussion and reply
(Emery, K. O., *et al.*) 7: I 689-694
— Uranium-series dating of the Pleistocene reef tracts of Barbados, West Indies
(Bender, M. L., *et al.*) 6: I 577-594

Atlantic region—tectonophysics
continental drift: Evolution of the Sao Paulo Plateau (southeastern Brazilian margin) and implications for the early history of the South Atlantic
(Kumar, N., *et al.*) 3: I 281-293

Australia—petrology
tektites: Australasian microtektites and the stratigraphic age of the australites; discussion and reply
(Chalmers, R. O., *et al.*) 5: I 508-512

Australia—tectonophysics
plate tectonics: Western margin of Australia; evolution of a rifted arch system; discussion and reply
(Stagg, H. M. J., *et al.*) 8: I 795-798

automatic data processing—general
cartography: Comparison of spatially filtered geologic maps; summary
(Eschner, T. R., *et al.*) 1: I 6-7, II 104-134

automatic data processing—geochronology
statistical methods: A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado
(Miller, C. D.) 12: I 1151-1164

automatic data processing—structural geology
digital simulation: Estimating densities in contoured orientation diagrams
(Ramsden, J., *et al.*) 3: I 229-231, II 580-607

Azores—geochronology
Quaternary: Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288

Barbados—geochronology
Pleistocene: Uranium-series dating of the Pleistocene reef tracts of Barbados, West Indies
(Bender, M. L., *et al.*) 6: I 577-594

Basin and Range Province—structural geology
tectonics: Candelaria and other left-oblique slip faults of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 149-163
— Cenozoic volcanism of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 143-145, II 456-493
— Deep fault trough of Oligocene age, Candelaria Hills, Nevada
(Speed, R. C., *et al.*) 2: I 145-148, II 494-527

Bering Sea—geophysical surveys
seismic surveys: Modern biogenic gas-generated craters (sea-floor "pockmarks") on the Bering Shelf, Alaska
(Nelson, H., *et al.*) 12: I 1144-1152

biogeography *see also under* paleontology *under* continental drift; *see also under* stratigraphy *under* Cambrian; Holocene; Paleozoic

biogeography—fossil man
Quaternary: Petrography of sand tempers in Pacific islands potsherds
(Dickinson, W. R., *et al.*) 11: I 993-995, II 1644-1701

biogeography—Trilobita
Cambrian: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

biography—general
Barton, Nicholas R.: Presentation of the E. B. Burwell, Jr. Award to Nicholas R. Barton
(Galster, R. W., *et al.*) 3: I 231, II 629-632
Epstein, Samuel: Presentation of the Arthur L. Day Medal to Samuel Epstein
(Wasserburg, G. J., *et al.*) 3: I 231, II 612-621
Garrels, Robert M.: Presentation of the Penrose Medal to Robert M. Garrels
(Sloss, L. L., *et al.*) 3: I 231, II 608-612
Hay, Richard L.: Presentation of the Kirk Bryan Award to Richard L. Hay
(Farrand, W. R., *et al.*) 3: I 231, II 621-623
Nelson, R. William: Presentation of the O. E. Meinzer Award to R. William Nelson
(Simpson, E. S., *et al.*) 3: I 231, II 623-629

Botswana—structural geology
neotectonics: Makgadikgadi Pans Complex of central Botswana
(Baillieul, T. A.) 2: I 133-136, II 289-312

boudinage *see under* style *under* lineation

Brachiopoda—biostratigraphy
Permian: Geology and paleontology of the Permian beds near Las Delicias, Coahuila, Mexico
(Wardlaw, B. R., *et al.*) 1: I 111-116

Brazil—oceanography
ocean floors: Evolution of the Sao Paulo Plateau (southeastern Brazilian margin) and implications for the early history of the South Atlantic
(Kumar, N., *et al.*) 3: I 281-293

British Columbia—geochemistry
trace elements: Chemical variation within the Coast Plutonic Complex of British Columbia between lat 53° and 55° N
(Smith, T. E., *et al.*) 4: I 346-356

British Columbia—structural geology
tectonics: The Selkirk fan structure of the southeastern Canadian Cordillera; discussion and reply
(Price, R. A., *et al.*) 7: I 695-698

California—geochemistry
metamorphic rocks: Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California
(Moore, D. E., *et al.*) 12: I 1089-1091, II 1737-1781
trace elements: Crystallization, fractionation, and solidification of the Tuolumne Intrusive Series, Yosemite National Park, California
(Bateman, P. C., *et al.*) 5: I 465-482
— Geochemistry of Brokeoff Volcano, California
(Fountain, J. C.) 3: I 294-300

California—geochronology
Quaternary: Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California
(Ku, T. L., *et al.*) 11: I 1063-1073

California—geomorphology
eolian features: Intradune flats of the Algodones chain, Imperial Valley, California
(Sharp, R. P.) 10: I 908-916
weathering: Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California
(Ku, T. L., *et al.*) 11: I 1063-1073

California—hydrogeology
ground water: Depositional control of aquifer characteristics in alluvial fans, Fresno County, California
(Cehrs, D.) 8: I 709-711, II 1282-1309

California—petrology
intrusions: Origin and emplacement of the Academy Pluton, Fresno County, California
(Mack, S., *et al.*) 4: I 321-323, II 633-694

California—sedimentary petrology
sedimentary rocks: Deposition of resedimented sandstone beds in the Pico Formation, Ventura Basin, California, as interpreted from magnetic fabric measurements
(Taira, A., *et al.*) 10: I 952-962

California—stratigraphy
Cretaceous: Evolution of the Late Cretaceous forearc basin, northern and central California
(Ingersoll, R. V.) 9: I 813-826
Mesozoic: Upper Mesozoic subsea fan deposits in the southern Diablo Range, California; record of the Sierra Nevada magmatic arc
(Mansfield, C. F.) 11: I 1025-1046
Miocene: Tectonic rotations of the Santa Monica Mountains region, western Transverse Ranges, California, suggested by paleomagnetic vectors
(Kamerling, M. J., *et al.*) 4: I 331-337
Paleogene: Paleogene sediment dispersal and paleotectonics in northern California
(Dickinson, W. R., *et al.*) 10: I 897-898, II 1458-1528

California—structural geology
structural analysis: Role of the Melones fault zone in the structural chronology of the North Yuba River area, western Sierra Nevada, California
(Cebull, S. E., *et al.*) 3: I 225-227, II 528-544
tectonics: Saline water in the foothill suture zone, Sierra Nevada Range, California
(Mack, S., *et al.*) 7: I 666-675
— Structural interpretation of the southern part of the northern Coast Ranges and Sacramento Valley, California
(Suppe, J.) 4: I 327-330
— Tectonic interpretation of a geologic section of the continental margin off San Luis Obispo, the southern Coast Ranges, and the San Joaquin Valley, California; cross-section summary
(Page, B. M., *et al.*) 9: I 808-812
— Tectonic outlier of Great Valley Sequence in Franciscan terrain, Diablo Range, California
(Bauder, J. M., *et al.*) 6: I 561-568

California—tectonophysics
crust: Tectonic interpretation of a geologic section of the continental margin off San Luis Obispo, the southern Coast Ranges, and the San Joaquin Valley, California; cross-section summary
(Page, B. M., *et al.*) 9: I 808-812
plate tectonics: Kaweah serpentinite melange, Southwest Sierra Nevada foothills, California
(Saleeby, J.) 1: I 29-46
— Late Cenozoic subduction and continental-margin truncation along the northern Middle America Trench; discussion and reply
(Beck, M. E., Jr., *et al.*) 8: I 792-794
— Neogene tectonic evolution of the California continental borderland and western Transverse Ranges
(Crouch, J. K.) 4: I 338-345
— Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083

Cambrian—stratigraphy
biogeography: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

Canada *see also* Alberta; Appalachians; Atlantic Coastal Plain; British Columbia; Great Lakes; Great Lakes region; Newfoundland; Nova Scotia; Ontario; Quebec; Rocky Mountains; Yukon Territory

carbon—isotopes
C-13/C-12: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982

carbonate rocks *see under* sedimentary rocks

Caribbean Sea—oceanography
sediments: North American microtektites in Deep Sea Drilling Project cores from the Caribbean Sea and Gulf of Mexico
(Glass, B. P., *et al.*) 6: I 595-602

Cenozoic *see also under* geochronology *under* Mexico; *see also under* stratigraphy *under* Colorado

Central America *see also* Costa Rica; Guatemala

Central America—tectonophysics
plate tectonics: Effect of volcanic activity on fluvial-deltaic sedimentation in a modern arc-trench gap, southwestern Guatemala
(Kuenzi, W. D., *et al.*) 9: I 827-838
— Ophiolite and island-arc volcanism in Costa Rica
(Galli-Olivier, C.) 5: I 444-452

changes of level *see also under* stratigraphy *under* Atlantic Coastal Plain; Atlantic Ocean

Chile—geochemistry
trace elements: Geochemistry of Mesozoic marginal basin floor igneous rocks from southern Chile
(Saunders, A. D., *et al.*) 3: I 237-258

Chile—structural geology
tectonics: Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012

clastic rocks *see under* sedimentary rocks

clastic sediments *see under* sediments

clay *see under* clastic sediments *under* sediments

clay mineralogy—experimental studies
X-ray diffraction analysis: Differentiation of surficial glacial drift in southeastern Michigan from 7-A°/10-A°X-ray diffraction ratios of clays
(Rieck, R. L., *et al.*) 2: I 216-220

cleavage *see under* style *under* foliation

Coelenterata—paleoecology
communities: Patch-reef communities and succession in the Oligocene of Antigua, West Indies
(Frost, S. H., *et al.*) 7: I 612-616, II 1094-1141

Coelenterata—Rugosa
Permian: Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455

Colorado—economic geology
uranium: Interpretation of lead-uranium ages of pitchblende deposits in the central Front Range, Colorado
(Phair, G.) 9: I 858-870

Colorado—environmental geology
geologic hazards: The determination of snow avalanche frequency through tree-ring analysis and historical records at Ophir, Colorado
(Carrara, P. E.) 8: I 773-780

Colorado—geochronology
Pleistocene: A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado
(Miller, C. D.) 12: I 1151-1164

Colorado—geomorphology
glacial geology: Fossil ice-wedge polygons in the Colorado Front Range; origin and significance
(Benedict, J. B.) 2: I 173-180
— Rock glacier morphometry, San Juan Mountains, Colorado
(White, P. G.) 6: I 515-518, II 924-952

Colorado—hydrogeology
ground water: Ground-water recharge to the aquifers of northern San Luis Valley, Colorado
(Huntley, D.) 8: I 707-709, II 1196-1281

Colorado—stratigraphy
Cenozoic: Cenozoic faulting and sedimentation in northern San Luis Valley, Colorado; summary
(Huntley, D.) 1: I 8-10, II 135-153

Colorado—structural geology
tectonics: The Colorado Lineament; a middle Precambrian wrench fault system; discussion and reply
(Hickman, M. H., *et al.*) 10: I 987-988

Colorado Plateau—environmental geology
geologic hazards: Holocene faulting in the western Grand Canyon, Arizona; discussion and reply
(Anderson, R. E., *et al.*) 2: I 221-224

Colorado Plateau—geomorphology
fluvial features: Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region; discussion and reply
(Everitt, B. L., *et al.*) 12: I 1183-1184

Connecticut—geomorphology
glacial geology: Regional stagnation of ice in northeastern Connecticut; an alternative model of deglaciation for part of New England; discussion and reply
(Clebnik, S. M., *et al.*) 1: I 117-120

conservation *see also under* environmental geology *under* North America

continental drift *see also under* stratigraphy *under* Pacific region; *see also under* tectonophysics *under* Atlantic region; Mediterranean Sea; North America

continental drift—paleontology
biogeography: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

continental shelf *see also under* oceanography *under* Alaska; Atlantic Ocean

Costa Rica—stratigraphy
Cretaceous: Ophiolite and island-arc volcanism in Costa Rica
(Galli-Olivier, C.) 5: I 444-452

Cretaceous *see also under* geochronology *under* West Indies; *see also under* stratigraphy *under* California; Costa Rica; Niger; Nigeria

crust *see also under* tectonophysics *under* California; Indian Ocean

crystal chemistry *see also* crystal growth; minerals

crystal chemistry—silicates
partitioning: Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California
(Moore, D. E., *et al.*) 12: I 1089-1091, II 1737-1781

crystal growth *see also* crystal chemistry; minerals

crystal growth—framework silicates, feldspar group
myrmekite: Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062

crystal structure *see also* crystal chemistry; minerals

Cyprus—stratigraphy
Mesozoic: Mamonia Complex, Southwest Cyprus; evolution and emplacement of a Mesozoic continental margin
(Robertson, A. H. F., *et al.*) 7: I 651-665

deformation *see also* structural analysis

deformation—field studies
augen structures: "Eyed folds" in Precambrian marbles from southeastern Rajasthan, India
(Mukhopadhyay, D., *et al.*) 4: I 397-404
finite strain: Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
recrystallization: Structure and metamorphism of the Otish Mountain area of the Grenvillian foreland zone, Quebec; summary
(Chown, E. H.) 1: I 13-15, II 178-196
shear: Deformation and metamorphism in the Hylas Zone and adjacent parts of the eastern Piedmont in Virginia
(Bobyarchick, A. R., *et al.*) 8: I 739-752
— Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012
strain: Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280
stress: Dolomite and quartz lamellae stress and strain analysis in a multiply-deformed terrane, West-central Vermont
(Detenbeck, J. C., *et al.*) 9: I 804-805, II 1377-1428
— Tectonic origin for Sudbury, Ontario, ... atter cones
(Fleet, M. E.) 12: I 1177-1182

deformation—theoretical studies
fold axes: Analysis of rotation of folds during progressive deformation
(Ramsay, D. M.) 8: I 732-738
fractures: Thermal expansion of fluids and fracture initiation in compacting sediments
(Domenico, P. A., *et al.*) 6: I 518-520, II 953-979
shear stress: Shear heating at the Olympos (Greece) thrust and the deformation properties of carbonates at geological strain rates
(Barton, C. M., *et al.*) 5: I 483-492
strain: Specification of fabric shapes using an eigenvalue method; discussion
(Cobbold, P. R., *et al.*) 3: I 310-312
Devonian *see also under* stratigraphy *under* Kentucky
diagenesis *see also* sedimentation
diagenesis—processes
cementation: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982
diastrophism *see* orogeny
diatremes *see under* intrusions
dikes *see under* intrusions
earthquakes *see also* seismology; *see also under* seismology *under* Mississippi Valley
Eastern Hemisphere *see also* Africa; Antarctica; Atlantic Ocean; Indian Ocean
Eastern U.S.—geochronology
Quaternary: Relict oysters on the United States Atlantic continental shelf; a reconsideration of their usefulness in understanding late Quaternary sea-level history; discussion and reply
(Emery, K. O., *et al.*) 7: I 689-694
— Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628
Eastern U.S.—stratigraphy
Jurassic: Geologic history and stratigraphy of the Triassic-Jurassic Culpeper Basin, Virginia
(Lindholm, R. C.) 11: I 995-997, II 1702-1736
ecology—angiosperms
rivers: Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region; discussion and reply
(Everitt, B. L., *et al.*) 12: I 1183-1184
Egypt—petrology
igneous rocks: Granitic and metamorphic rocks of the Taif area, western Saudi Arabia; discussion and reply
(Church, W. R., *et al.*) 9: I 893-896
electrical logging *see* well-logging
engineering geology *see also* deformation; ground water; rock mechanics; soil mechanics; waterways
environmental geology *see also* ecology
Eocene *see also under* stratigraphy *under* Pacific Ocean; Wyoming
eolian features *see under* geomorphology
epeirogeny *see also* orogeny
erosion *see under* processes *under* geomorphology
erosion surfaces *see under* erosion features *under* geomorphology
Europe *see also* the individual nations
faults—displacements
active faults: Late Holocene faulting and earthquake recurrence in the Reelfoot Lake area, northwestern Tennessee
(Russ, D. P.) 11: I 1013-1018
— Recurrent faulting in the vicinity of Reelfoot Lake, northwestern Tennessee
(Zoback, M. D.) 11: I 1019-1024
normal faults: Cenozoic faulting and sedimentation in northern San Luis Valley, Colorado; summary
(Huntley, D.) 1: I 8-10, II 135-153
overthrust faults: Oligocene and Miocene metamorphism, folding, and low-angle faulting in northwestern Utah; discussion and reply
(Crittenden, M. D., Jr., *et al.*) 3: I 305-309
— Overthrust emplacement of the Numidian flysch complex in the westernmost Mogod Mountains, Tunisia
(Carr, M. D., *et al.*) 6: I 513-515, II 886-923
strike-slip faults: Structure and metamorphism of the Otish Mountain area of the Grenvillian foreland zone, Quebec; summary
(Chown, E. H.) 1: I 13-15, II 178-196
thrust faults: Shear heating at the Olympos (Greece) thrust and the deformation properties of carbonates at geological strain rates
(Barton, C. M., *et al.*) 5: I 483-492
wrench faults: The Colorado Lineament; a middle Precambrian wrench fault system; discussion and reply
(Dutch, S. I., *et al.*) 3: I 313-316
— The Colorado Lineament; a middle Precambrian wrench fault system; discussion and reply
(Hickman, M. H., *et al.*) 10: I 987-988
faults—distribution
fault scarps: Holocene faulting in the western Grand Canyon, Arizona; discussion and reply
(Anderson, R. E., *et al.*) 2: I 221-224
troughs: Cenozoic volcanism of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 143-145, II 456-493
— Deep fault trough of Oligocene age, Candelaria Hills, Nevada
(Speed, R. C., *et al.*) 2: I 145-148, II 494-527
— Mid-Cenozoic volcano-tectonic troughs in central Nevada
(Burke, D. B., *et al.*) 2: I 181-184
faults—effects
mylonite: Deformation and metamorphism in the Hylas Zone and adjacent parts of the eastern Piedmont in Virginia
(Bobyarchick, A. R., *et al.*) 8: I 739-752
shear zones: Anatomy of a mining-induced fault zone
(Gay, N. C., *et al.*) 1: I 47-58
— Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
striations: The extraordinary striated outcrop at Saqsaywaman, Peru; discussion and reply
(Schopf, J. M., *et al.*) 3: I 320
faults—patterns
en echelon faults: Candelaria and other left-oblique slip faults of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 149-163
Florida—stratigraphy
Holocene: Evolution of Florida Bay from island stratigraphy
(Enos, P., *et al.*) 1: I 59-83
fluid inclusions—paleosalinity
halite: Fluid inclusion evidence for Silurian evaporites in southeastern Vermont
(Rich, R. A.) 10: I 901-902, II 1628-1643
folds—orientation
interference patterns: "Eyed folds" in Precambrian marbles from southeastern Rajasthan, India
(Mukhopadhyay, D., *et al.*) 4: I 397-404
folds—style
synclines: Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280
folds—systems
anticlinoria: Deformation at various scales in the South Mountain Anticlinorium of the central Appalachians
(Mitra, S.) 3: I 227-229, II 545-579
folds—theoretical studies
fold axes: Analysis of rotation of folds during progressive deformation
(Ramsay, D. M.) 8: I 732-738
foliation *see also* structural analysis
foliation—style
cleavage: Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
— Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280
— Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195

slip cleavage: The Selkirk fan structure of the southeastern Canadian Cordillera; discussion and reply
(Price, R. A., *et al.*) 7: I 695-698

foraminifera—biostratigraphy
Cretaceous: Stratigraphic history of the South-central Saharan region
(Petters, S. W.) 8: I 753-760
Eocene: Middle Eocene pelagic microfossils from the Nazca Plate
(Coulbourn, W. T., *et al.*) 7: I 634-650
Tertiary: Overthrust emplacement of the Numidian flysch complex in the westernmost Mogod Mountains, Tunisia
(Carr, M. D., *et al.*) 6: I 513-515, II 886-923

foraminifera—Fusulinidae
Permian: Geology and paleontology of the Permian beds near Las Delicias, Coahuila, Mexico
(Wardlaw, B. R., *et al.*) 1: I 111-116
— Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455

foraminifera—occurrence
turbidite: Black Shell turbidite, Hatteras abyssal plain, western Atlantic Ocean
(Elmore, R. D., *et al.*) 12: I 1165-1176

fossil man—biogeography
archaeology: Petrography of sand tempers in Pacific islands potsherds
(Dickinson, W. R., *et al.*) 11: I 993-995, II 1644-1701

fossils *see* appropriate fossil group

foundations *see also* rock mechanics; soil mechanics

fractures—genesis
mechanism: Thermal expansion of fluids and fracture initiation in compacting sediments
(Domenico, P. A., *et al.*) 6: I 518-520, II 953-979
tension: Origin of steeply inclined fractures in central and western New York State
(Wallach, J. L., *et al.*) 5: I 417-421, II 789-827

fractures—style
conical fractures: Tectonic origin for Sudbury, Ontario, shatter cones
(Fleet, M. E.) 12: I 1177-1182

genesis of ore deposits *see* mineral deposits, genesis

geochemistry—processes
biodegradation: Modern biogenic gas-generated craters (sea-floor "pockmarks") on the Bering Shelf, Alaska
(Nelson, H., *et al.*) 12: I 1144-1152

geochronology *see also* absolute age

geochronology—methods
statistical methods: A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado
(Miller, C. D.) 12: I 1151-1164

geochronology—tephrochronology
Quaternary: Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288

geochronology—tree rings
applications: The determination of snow avalanche frequency through tree-ring analysis and historical records at Ophir, Colorado
(Carrara, P. E.) 8: I 773-780

geologic hazards *see also under* environmental geology *under* Colorado; Colorado Plateau

geology—practice
international cooperation: Geology in China; summary
(Drake, C. L.) 1: I 1-2, II 1-33

geomorphology *see also* glacial geology

geomorphology—eolian features
intradune flats: Intradune flats of the Algodones chain, Imperial Valley, California
(Sharp, R. P.) 10: I 908-916

geomorphology—erosion features
erosion surfaces: New K-Ar dates and the late Pliocene to Holocene geomorphic history of the central Rio Grande region, New Mexico; discussion
(Stearns, C. E.) 8: I 799-800

geomorphology—fluvial features
braided streams: A study of stream braiding
(Hong, L. B., *et al.*) 12: I 1094-1095, II 1839-1859
— Flow competence in relation to stream channel form and braiding
(Cheetham, G. H.) 9: I 877-886
channel geometry: The relationship between channel shape and sediment characteristics in the channel perimeter
(Miller, T. K., *et al.*) 3: I 301-304
drainage patterns: Drainage evolution and fish dispersal in the central Appalachians
(Hocutt, C. H.) 2: I 129-130, II 197-234
— Stream network volume; an index of channel morphometry; discussion and reply
(Ferguson, R., *et al.*) 6: I 606-608
— Topology of ridge patterns; randomness and constraints
(Mark, D. M.) 2: I 164-172
ephemeral streams: Note on some spatial and temporal variations in ephemeral channel form
(Rendell, H., *et al.*) 8: I 761-772
extinct lakes: Makgadikgadi Pans Complex of central Botswana
(Baillieul, T. A.) 2: I 133-136, II 289-312
landform evolution: Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region; discussion and reply
(Everitt, B. L., *et al.*) 12: I 1183-1184

geomorphology—impact features
meteor craters: Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Halls, H. C.) 11: I 1084-1086
— Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Robertson, P. B., *et al.*) 11: I 1087-1088

geomorphology—landform description
fault scarps: Holocene faulting in the western Grand Canyon, Arizona; discussion and reply
(Anderson, R. E., *et al.*) 2: I 221-224
outcrops: The extraordinary striated outcrop at Saqsaywaman, Peru; discussion and reply
(Schopf, J. M., *et al.*) 3: I 320

geomorphology—landform evolution
coastal plains: Effect of volcanic activity on fluvial-deltaic sedimentation in a modern arc-trench gap, southwestern Guatemala
(Kuenzi, W. D., *et al.*) 9: I 827-838

geomorphology—processes
erosion: Electron micrography of mineral surfaces subject to wind-blast erosion
(Whitney, M. I.) 10: I 917-934
sedimentation: Threshold of critical power in streams
(Bull, W. B.) 5: I 453-464

geomorphology—shore features
barrier islands: Barrier island development along the Alaskan-Yukon coastal plains; summary
(Short, A. D.) 1: I 3-5, II 77-103
— Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215
islands: Evolution of Florida Bay from island stratigraphy
(Enos, P., *et al.*) 1: I 59-83

geomorphology—solution features
karst: Morphology and distribution of residual limestone hills (mogotes) in the karst of northern Puerto Rico; discussion and reply
(McDonald, R. C., *et al.*) 4: I 414-416
— Quantitative morphology of landforms in carbonate rock basins in the Appalachian Highlands
(White, E. L., *et al.*) 4: I 385-396

geomorphology—volcanic features
calderas: Volcanic structure of the crest of the Puna Ridge, Hawaii; geophysical implications of submarine volcanic terrain; discussion and reply
(Goldie, R. J., *et al.*) 7: I 703-704

geophysical surveys *see* gravity surveys *under* geophysical surveys *under* Nevada; Norway; *see* seismic surveys *under* geophysical surveys *under* Atlantic Ocean; Bering Sea; Tennessee

geophysics *see also* deformation

geosynclines *see also* orogeny

geosynclines—processes
Cordilleran Geosyncline: Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455

Ghana—structural geology
tectonics: Geologic structure and evolution of the Keta Basin, West Africa; discussion and reply
(Hastings, D. A., *et al.*) 9: I 889-892

glacial geology *see also* geomorphology

glacial geology—glacial features
moraines: A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado
(Miller, C. D.) 12: I 1151-1164
— Late Wisconsinan ice recession in East-central New York; discussion and reply
(Connally, G. G., *et al.*) 6: I 603-605
striations: The extraordinary striated outcrop at Saqsaywaman, Peru; discussion and reply
(Schopf, J. M., *et al.*) 3: I 320

glacial geology—glaciation
deglaciation: Deglaciation events in the western Catskill Mountains, New York
(Kirkland, J. T.) 6: I 521-524
— Glacial and postglacial sediments in lakes Superior and Michigan
(Lineback, J. A., *et al.*) 8: I 781-791
— Regional stagnation of ice in northeastern Connecticut; an alternative model of deglaciation for part of New England; discussion and reply
(Clebnik, S. M., *et al.*) 1: I 117-120
deposition: Differentiation of surficial glacial drift in southeastern Michigan from 7-A°/10-A°X-ray diffraction ratios of clays
(Rieck, R. L., *et al.*) 2: I 216-220
extent: Quaternary stratigraphy and chronology of Mauna Kea, Hawaii; a 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation
(Porter, S. C.) 7: I 609-611, II 980-1093

glacial geology—glaciers
rock glaciers: Rock glacier morphometry, San Juan Mountains, Colorado
(White, P. G.) 6: I 515-518, II 924-952

glacial geology—periglacial features
patterned ground: Fossil ice-wedge polygons in the Colorado Front Range; origin and significance
(Benedict, J. B.) 2: I 173-180

glaciation *see under* glacial geology

glaciers *see under* glacial geology

graded bedding *see under* turbidity current structures *under* sedimentary structures

Graptolithina—biostratigraphy
Ordovician: The Taconides of western New Jersey; new evidence from the Jutland Klippe; summary
(Perissoratis, C., *et al.*) 1: I 10-13, II 154-177

gravity surveys *see under* geophysical surveys *under* Nevada; Norway

Great Basin—tectonophysics
plate tectonics: Mid-Cenozoic volcano-tectonic troughs in central Nevada
(Burke, D. B., *et al.*) 2: I 181-184

Great Lakes—stratigraphy
Quaternary: Glacial and postglacial sediments in lakes Superior and Michigan
(Lineback, J. A., *et al.*) 8: I 781-791

Great Lakes region—geomorphology
meteor craters: Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Halls, H. C.) 11: I 1084-1086
— Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Robertson, P. B., *et al.*) 11: I 1087-1088

Greater Antilles—structural geology
tectonics: Ages of deposition, deformation, and intrusion of Cretaceous rocks, eastern St. Croix, Virgin Islands
(Speed, R. C., *et al.*) 7: I 629-632

Greece—structural geology
tectonics: Structural evolution of the Vardar root zone, northern Greece; discussion and reply
(Barton, C. M., *et al.*) 1: I 125-128

Greece—tectonophysics
heat flow: Shear heating at the Olympos (Greece) thrust and the deformation properties of carbonates at geological strain rates
(Barton, C. M., *et al.*) 5: I 483-492

ground water *see also* hydrology

ground water—surveys
California: Depositional control of aquifer characteristics in alluvial fans, Fresno County, California
(Cehrs, D.) 8: I 709-711, II 1282-1309
— Saline water in the foothill suture zone, Sierra Nevada Range, California
(Mack, S., *et al.*) 7: I 666-675
Colorado: Ground-water recharge to the aquifers of northern San Luis Valley, Colorado
(Huntley, D.) 8: I 707-709, II 1196-1281

Guatemala—geomorphology
landform evolution: Effect of volcanic activity on fluvial-deltaic sedimentation in a modern arc-trench gap, southwestern Guatemala
(Kuenzi, W. D., *et al.*) 9: I 827-838

Gulf of California—tectonophysics
plate tectonics: The record of Cenozoic volcanism around the Gulf of California
(Gastil, G., *et al.*) 9: I 839-857

Gulf of Mexico—oceanography
sedimentation: Hydraulic differentiation of heavy minerals, offshore Alabama and Mississippi
(Drummond, S. E., *et al.*) 9: I 806-807, II 1429-1457
sediments: North American microtektites in Deep Sea Drilling Project cores from the Caribbean Sea and Gulf of Mexico
(Glass, B. P., *et al.*) 6: I 595-602

Hawaii—geochronology
Quaternary: Quaternary stratigraphy and chronology of Mauna Kea, Hawaii; a 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation
(Porter, S. C.) 7: I 609-611, II 980-1093

Hawaii—geomorphology
volcanic features: Volcanic structure of the crest of the Puna Ridge, Hawaii; geophysical implications of submarine volcanic terrain; discussion and reply
(Goldie, R. J., *et al.*) 7: I 703-704

Hawaii—volcanology
Mauna Loa: Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii; visual observations from U. S. Navy deep submergence vehicle DSV Sea Cliff
(Fornari, D. J., *et al.*) 5: I 435-443

heat flow *see also under* tectonophysics *under* Greece

Himalayas—tectonophysics
plate tectonics: Vertical tectonics in the middle Himalayas; an appraisal from recent gravity data; discussion and reply
(Sinha Roy, S., *et al.*) 3: I 317-319

Holocene *see also under* stratigraphy *under* Florida; Rocky Mountains

Holocene—stratigraphy
biogeography: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

hydrocarbons *see under* organic materials

hydrogeology *see also* ground water; hydrology

hydrology *see also* ground water

hydrology—rivers and streams
drainage patterns: Stream network volume; an index of channel morphometry; discussion and reply
(Ferguson, R., *et al.*) 6: I 606-608
experimental studies: A study of stream braiding
(Hong, L. B., *et al.*) 12: I 1094-1095, II 1839-1859
sedimentation: A sorting mechanism for a riffle-pool sequence
(Lisle, T.) 7: I 616-617, II 1142-1157
— The relationship between channel shape and sediment characteristics in the channel perimeter
(Miller, T. K., *et al.*) 3: I 301-304
transport: Threshold of critical power in streams
(Bull, W. B.) 5: I 453-464

hydrology—surveys
Colorado River: Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region; discussion and reply
(Everitt, B. L., *et al.*) 12: I 1183-1184
Norway: Flow competence in relation to stream channel form and braiding
(Cheetham, G. H.) 9: I 877-886

igneous rocks *see also* magmas; metamorphic rocks; metasomatism; phase equilibria

igneous rocks—basalt family
diabase: Magnetic and chemical variations of Mesozoic diabase dikes from eastern North America; evidence for a hotspot in the Carolinas?
(de Boer, J., *et al.*) 2: I 185-198
tholeiite: Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii; visual observations from U. S. Navy deep submergence vehicle DSV Sea Cliff
(Fornari, D. J., *et al.*) 5: I 435-443

igneous rocks—gabbro family
anorthosite: Gravity interpretation of the Egersund anorthosite complex, Norway; its petrological and geothermal significance
(Smithson, S. B., *et al.*) 2: I 199-204

igneous rocks—granite-granodiorite family
textures: Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062

igneous rocks—mafic composition
distribution: Granitic and metamorphic rocks of the Taif area, western Saudi Arabia; discussion and reply
(Church, W. R., *et al.*) 9: I 893-896

igneous rocks—petrology
genesis: Petrogenesis of the Mount Albert ultramafic massif, Quebec
(MacGregor, I. D., *et al.*) 10: I 898-900, II 1529-1627

igneous rocks—plutonic rocks
genesis: Origin and emplacement of the Academy Pluton, Fresno County, California
(Mack, S., *et al.*) 4: I 321-323, II 633-694
— The geochemistry and origin of the Devonian granitic rocks of Southwest Nova Scotia
(Smith, T. E.) 5: I 424-426, II 850-885
geochemistry: Chemical variation within the Coast Plutonic Complex of British Columbia between lat 53° and 55° N
(Smith, T. E., *et al.*) 4: I 346-356
mafic composition: Origin of the plutonic mafic rocks of southern Nova Scotia
(de Albuquerque, C. A. R.) 8: I 719-731
petrology: Crystallization, fractionation, and solidification of the Tuolumne Intrusive Series, Yosemite National Park, California
(Bateman, P. C., *et al.*) 5: I 465-482

igneous rocks—pyroclastics and glasses
genesis: Emplacement temperatures of unsorted and unstratified deposits of volcanic rock debris as determined by paleomagnetic techniques
(Hoblitt, R. P., *et al.*) 7: I 633-642
tuff: Cenozoic volcanism of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 143-145, II 456-493
volcanic ash: Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288

igneous rocks—textures
orbicular texture: Igneous origin of the orbicular rocks of the Sandia Mountains, New Mexico
(Enz, R. D., *et al.*) 2: I 138-140, II 349-380

igneous rocks—ultramafic family
ophiolite: Alpine magmatic and metamorphic processes and plate tectonics in the Zagros Range, Iran
(Pamic, J., *et al.*) 6: I 569-576
— Ophiolite and island-arc volcanism in Costa Rica
(Galli-Olivier, C.) 5: I 444-452
— Ophiolite complexes on Small Nggela Island, Solomon Islands
(Neef, G., *et al.*) 2: I 136-138, II 313-348
— Plagiogranite and keratophyre in ophiolite on Fidalgo Island, Washington
(Brown, E. H., *et al.*) 5: I 493-507
— Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012
— Structural evolution of the Vardar root zone, northern Greece; discussion and reply
(Barton, C. M., *et al.*) 1: I 125-128

igneous rocks—volcanic rocks
calc-alkalic composition: Mid-Cenozoic volcano-tectonic troughs in central Nevada
(Burke, D. B., *et al.*) 2: I 181-184
— Petrology of the Marysvale volcanic field, Utah; summary
(Wender, L. E., *et al.*) 1: I 2-3, II 34-76
composition: The record of Cenozoic volcanism around the Gulf of California
(Gastil, G., *et al.*) 9: I 839-857
geochemistry: Geochemistry of Brokeoff Volcano, California
(Fountain, J. C.) 3: I 294-300
petrology: Geology and petrology of the McMurdo Volcanic Group at Rainbow Ridge, Brown Peninsula, Antarctica
(Kyle, P. R., *et al.*) 7: I 676-688

impact features *see under* geomorphology

inclusions *see also* fluid inclusions

India—structural geology
structural analysis: "Eyed folds" in Precambrian marbles from southeastern Rajasthan, India
(Mukhopadhyay, D., *et al.*) 4: I 397-404

Indian Ocean—tectonophysics
crust: Western margin of Australia; evolution of a rifted arch system; discussion and reply
(Stagg, H. M. J., *et al.*) 8: I 795-798

intrusions—diatremes
emplacement: Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Halls, H. C.) 11: I 1084-1086
— Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Robertson, P. B., *et al.*) 11: I 1087-1088

intrusions—dikes
age: Ages of deposition, deformation, and intrusion of Cretaceous rocks, eastern St. Croix, Virgin Islands
(Speed, R. C., *et al.*) 7: I 629-632
dike swarms: Magnetic and chemical variations of Mesozoic diabase dikes from eastern North America; evidence for a hotspot in the Carolinas?
(de Boer, J., *et al.*) 2: I 185-198
extent: Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii; visual observations from U. S. Navy deep submergence vehicle DSV Sea Cliff
(Fornari, D. J., *et al.*) 5: I 435-443

intrusions—layered intrusions
genesis: Petrogenesis of the Mount Albert ultramafic massif, Quebec
(MacGregor, I. D., *et al.*) 10: I 898-900, II 1529-1627

intrusions—plutons
crystallization: Crystallization, fractionation, and solidification of the Tuolumne Intrusive Series, Yosemite National Park, California
(Bateman, P. C., *et al.*) 5: I 465-482
— Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062
emplacement: Origin and emplacement of the Academy Pluton, Fresno County, California
(Mack, S., *et al.*) 4: I 321-323, II 633-694
— Upper Mesozoic subsea fan deposits in the southern Diablo Range, California; record of the Sierra Nevada magmatic arc
(Mansfield, C. F.) 11: I 1025-1046
genesis: The geochemistry and origin of the Devonian granitic rocks of Southwest Nova Scotia
(Smith, T. E.) 5: I 424-426, II 850-885
geochemistry: Chemical variation within the Coast Plutonic Complex of British Columbia between lat 53° and 55° N
(Smith, T. E., *et al.*) 4: I 346-356
intrusions—structure
gravity anomalies: Gravity interpretation of the Egersund anorthosite complex, Norway; its petrological and geothermal significance
(Smithson, S. B., *et al.*) 2: I 199-204
Invertebrata *see also* Arthropoda; Brachiopoda; Coelenterata; foraminifera; Graptolithina; Mollusca; Radiolaria; Trilobita
Iran—tectonophysics
plate tectonics: Alpine magmatic and metamorphic processes and plate tectonics in the Zagros Range, Iran
(Pamic, J., *et al.*) 6: I 569-576
isotope dating *see* absolute age
isotopes *see also* absolute age; geochronology
isotopes—sedimentary rocks
limestone: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982
Italy—geomorphology
fluvial features: Note on some spatial and temporal variations in ephemeral channel form
(Rendell, H., *et al.*) 8: I 761-772
Jurassic *see also under* stratigraphy *under* Eastern U.S.
karst *see under* solution features *under* geomorphology
Kentucky—stratigraphy
Devonian: Use of scintillometer and gamma-ray logs for correlation and stratigraphy in homogeneous black shales
(Ettensohn, F. R., *et al.*) 5: I 421-423, II 828-849
lakes *see under* environment *under* sedimentation
landform description *see under* geomorphology
lava *see also* igneous rocks; magmas
lava—age
absolute age: K-Ar geochronology of Oligocene volcanic rocks, Davis and Barrilla mountains, Texas
(Parker, D. F., *et al.*) 12: I 1100-1110
— New K-Ar dates and the late Pliocene to Holocene geomorphic history of the central Rio Grande region, New Mexico; discussion
(Stearns, C. E.) 8: I 799-800
— Quaternary stratigraphy and chronology of Mauna Kea, Hawaii; a 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation
(Porter, S. C.) 7: I 609-611, II 980-1093
lava—geochemistry
major elements: Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii; visual observations from U. S. Navy deep submergence vehicle DSV Sea Cliff
(Fornari, D. J., *et al.*) 5: I 435-443
pillow lava: Geochemistry of Mesozoic marginal basin floor igneous rocks from southern Chile
(Saunders, A. D., *et al.*) 3: I 237-258
rare earths: Geochemistry of Brokeoff Volcano, California
(Fountain, J. C.) 3: I 294-300
trace elements: Geology and petrology of the McMurdo Volcanic Group at Rainbow Ridge, Brown Peninsula, Antarctica
(Kyle, P. R., *et al.*) 7: I 676-688
— Petrology of the Marysvale volcanic field, Utah; summary
(Wender, L. E., *et al.*) 1: I 2-3, II 34-76
Lesser Antilles—stratigraphy
Oligocene: Patch-reef communities and succession in the Oligocene of Antigua, West Indies
(Frost, S. H., *et al.*) 7: I 612-616, II 1094-1141
limestone *see also under* carbonate rocks *under* sedimentary rocks
lineation *see also* foliation; structural analysis
lineation—style
boudinage: Deformation at various scales in the South Mountain Anticlinorium of the central Appalachians
(Mitra, S.) 3: I 227-229, II 545-579
magmas *see also* igneous rocks; intrusions; lava
magmas—differentiation
fractional crystallization: Crystallization, fractionation, and solidification of the Tuolumne Intrusive Series, Yosemite National Park, California
(Bateman, P. C., *et al.*) 5: I 465-482
— Geology and petrology of the McMurdo Volcanic Group at Rainbow Ridge, Brown Peninsula, Antarctica
(Kyle, P. R., *et al.*) 7: I 676-688
— Petrology of the Marysvale volcanic field, Utah; summary
(Wender, L. E., *et al.*) 1: I 2-3, II 34-76
granitic composition: Igneous origin of the orbicular rocks of the Sandia Mountains, New Mexico
(Enz, R. D., *et al.*) 2: I 138-140, II 349-380
myrmekite: Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062
segregation: The geochemistry and origin of the Devonian granitic rocks of Southwest Nova Scotia
(Smith, T. E.) 5: I 424-426, II 850-885
magmas—genesis
mixing: Geochemistry of Brokeoff Volcano, California
(Fountain, J. C.) 3: I 294-300
submarine environment: Plagiogranite and keratophyre in ophiolite on Fidalgo Island, Washington
(Brown, E. H., *et al.*) 5: I 493-507
magmas—geochemistry
trace elements: Origin of the plutonic mafic rocks of southern Nova Scotia
(de Albuquerque, C. A. R.) 8: I 719-731
man, fossil *see* fossil man
maps—cartography
structure contour maps: Comparison of spatially filtered geologic maps; summary
(Eschner, T. R., *et al.*) 1: I 6-7, II 104-134
Mars—geomorphology
erosion: Aerodynamic and vorticity erosion of Mars; Part I, The Formation of channels
(Whitney, M. I.) 12: I 1111-1127
— Aerodynamic and vorticity erosion of Mars; Part II, Vortex features, related systems and some possible global patterns of erosion
(Whitney, M. I.) 12: I 1128-1143
Maryland—structural geology
deformation: Deformation at various scales in the South Mountain Anticlinorium of the central Appalachians
(Mitra, S.) 3: I 227-229, II 545-579
Massachusetts—petrology
metamorphism: Polymetamorphism in the Silurian-Devonian Goshen Formation of western Massachusetts
(Abbott, R. N., Jr.) 9: I 871-876
mathematical geology *see also* automatic data processing
Mediterranean region—stratigraphy
Tertiary: Overthrust emplacement of the Numidian flysch complex in the westernmost Mogod Mountains, Tunisia
(Carr, M. D., *et al.*) 6: I 513-515, II 886-923

Mediterranean region—structural geology
tectonics: Mamonia Complex, Southwest Cyprus; evolution and emplacement of a Mesozoic continental margin
(Robertson, A. H. F., *et al.*) 7: I 651-665
— Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083

Mediterranean region—tectonophysics
plate tectonics: Aegean and surrounding regions; complex multiplate and continuum tectonics in a convergent zone
(Dewey, J. F., *et al.*) 1: I 84-92
— Structural evolution of the Vardar root zone, northern Greece; discussion and reply
(Barton, C. M., *et al.*) 1: I 125-128

Mediterranean Sea *see also* Aegean Sea

Mediterranean Sea—tectonophysics
continental drift: Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083
plate tectonics: Mamonia Complex, Southwest Cyprus; evolution and emplacement of a Mesozoic continental margin
(Robertson, A. H. F., *et al.*) 7: I 651-665

Melanesia *see also* Solomon Islands

Melanesia—stratigraphy
Quaternary: Petrography of sand tempers in Pacific islands potsherds
(Dickinson, W. R., *et al.*) 11: I 993-995, II 1644-1701

melange *see under* interpretation *under* structural analysis

Mesozoic *see also under* stratigraphy *under* California; Cyprus; North America; Pacific Coast

metals—abundance
sediments: Metal accumulation rates in the central equatorial Pacific during Cenozoic time
(Leinen, M., *et al.*) 4: I 357-375

metamorphic rocks *see also* igneous rocks; metamorphism; metasomatism

metamorphic rocks—correlation
ophiolite: Tectonic outlier of Great Valley Sequence in Franciscan terrain, Diablo Range, California
(Bauder, J. M., *et al.*) 6: I 561-568

metamorphic rocks—facies
amphibolite facies: Geology and structure of the southern part of the Tobacco Root Mountains, southwestern Montana; map summary
(Vitaliano, C. J., *et al.*) 8: I 712-715

metamorphic rocks—marbles
textures: "Eyed folds" in Precambrian marbles from southeastern Rajasthan, India
(Mukhopadhyay, D., *et al.*) 4: I 397-404

metamorphic rocks—metaigneous rocks
metagranite: Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
ophiolite: Geochemistry of Mesozoic marginal basin floor igneous rocks from southern Chile
(Saunders, A. D., *et al.*) 3: I 237-258
— Kaweah serpentinite melange, Southwest Sierra Nevada foothills, California
(Saleeby, J.) 1: I 29-46

metamorphic rocks—metasedimentary rocks
metaconglomerate: Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California
(Moore, D. E., *et al.*) 12: I 1089-1091, II 1737-1781
mineral assemblages: Polymetamorphism in the Silurian-Devonian Goshen Formation of western Massachusetts
(Abbott, R. N., Jr.) 9: I 871-876

metamorphic rocks—migmatites
genesis: Genesis of the Skagit Gneiss migmatites, Washington, and the distinction between possible mechanisms of migmatization; discussion and reply
(Ashworth, J. R., *et al.*) 9: I 887-888

metamorphic rocks—mylonites
ultramylonite: Deformation and metamorphism in the Hylas Zone and adjacent parts of the eastern Piedmont in Virginia
(Bobyarchick, A. R., *et al.*) 8: I 739-752

metamorphic rocks—petrography
quartzite: Tectonic origin for Sudbury, Ontario, shatter cones
(Fleet, M. E.) 12: I 1177-1182

metamorphic rocks—petrology
complexes: Alpine magmatic and metamorphic processes and plate tectonics in the Zagros Range, Iran
(Pamic, J., *et al.*) 6: I 569-576
— Geology and structure of the central Ruby Range, Madison County, Montana
(Garihan, J. M.) 4: I 323-326, II 695-788

metamorphic rocks—schists
pelitic schist: Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195

metamorphic rocks—textures
petrofabrics: Structural distinction between a metasedimentary cover and an underlying basement in the 600-m.y.-old Pan-African domain of northwestern Nigeria, West Africa; discussion and reply
(Mullan, H. S., *et al.*) 10: I 983-984

metamorphism—contact metamorphism
aureoles: Petrogenesis of the Mount Albert ultramafic massif, Quebec
(MacGregor, I. D., *et al.*) 10: I 898-900, II 1529-1627

metamorphism—grade
isograds: Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195
low-grade metamorphism: Geochemistry of Mesozoic marginal basin floor igneous rocks from southern Chile
(Saunders, A. D., *et al.*) 3: I 237-258

metamorphism—P-T conditions
indicators: Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California
(Moore, D. E., *et al.*) 12: I 1089-1091, II 1737-1781

metamorphism—polymetamorphism
mineral assemblages: Polymetamorphism in the Silurian-Devonian Goshen Formation of western Massachusetts
(Abbott, R. N., Jr.) 9: I 871-876

metamorphism—processes
migmatization: Genesis of the Skagit Gneiss migmatites, Washington, and the distinction between possible mechanisms of migmatization; discussion and reply
(Ashworth, J. R., *et al.*) 9: I 887-888

metamorphism—prograde metamorphism
environment: Fluid inclusion evidence for Silurian evaporites in southeastern Vermont
(Rich, R. A.) 10: I 901-902, II 1628-1643
extent: Structure and metamorphism of the Otish Mountain area of the Grenvillian foreland zone, Quebec; summary
(Chown, E. H.) 1: I 13-15, II 178-196

metamorphism—shock metamorphism
indicators: Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Halls, H. C.) 11: I 1084-1086
— Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Robertson, P. B., *et al.*) 11: I 1087-1088

metasomatic rocks—occurrence
serpentinite: Kaweah serpentinite melange, Southwest Sierra Nevada foothills, California
(Saleeby, J.) 1: I 29-46

metasomatism—processes
serpentinization: Ophiolite complexes on Small Nggela Island, Solomon Islands
(Neef, G., *et al.*) 2: I 136-138, II 313-348

meteor craters *see also under* geomorphology *under* Great Lakes region; Ontario

Mexico *see also* Gulf of California

Mexico—areal geology
Nayarit: Reconnaissance geology of West-central Nayarit, Mexico; summary
(Gastil, G., *et al.*) 1: I 15-18

Mexico—geochronology
Cenozoic: The record of Cenozoic volcanism around the Gulf of California
(Gastil, G., *et al.*) 9: I 839-857

Mexico—stratigraphy
Permian: Geology and paleontology of the Permian beds near Las Delicias, Coahuila, Mexico
(Wardlaw, B. R., *et al.*) 1: I 111-116

Mexico—tectonophysics
plate tectonics: Late Cenozoic subduction and continental-margin truncation along the northern Middle America Trench; discussion and reply
(Beck, M. E., Jr., *et al.*) 8: I 792-794

Michigan—stratigraphy
Pleistocene: Differentiation of surficial glacial drift in southeastern Michigan from 7-A°/10-A°X-ray diffraction ratios of clays
(Rieck, R. L., *et al.*) 2: I 216-220

Micronesia—stratigraphy
Quaternary: Petrography of sand tempers in Pacific islands potsherds
(Dickinson, W. R., *et al.*) 11: I 993-995, II 1644-1701

Middle East *see also* Cyprus

mineral deposits, genesis—uranium
age: Interpretation of lead-uranium ages of pitchblende deposits in the central Front Range, Colorado
(Phair, G.) 9: I 858-870

mineral resources *see also under* economic geology *under* United States

minerals *see also* crystal chemistry; crystal growth

minerals—framework silicates, feldspar group
myrmekite: Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062

minerals—framework silicates, silica minerals
opal: Biogenic silica accumulation in the central equatorial Pacific and its implications for Cenozoic paleoceanography
(Leinen, M.) 9: I 801-803, II 1310-1376

minerals—silicates
crystal chemistry: Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California
(Moore, D. E., *et al.*) 12: I 1089-1091, II 1737-1781

Miocene *see also under* stratigraphy *under* California

Mississippi—oceanography
sedimentation: Hydraulic differentiation of heavy minerals, offshore Alabama and Mississippi
(Drummond, S. E., *et al.*) 9: I 806-807, II 1429-1457

Mississippi Valley—seismology
earthquakes: Late Holocene faulting and earthquake recurrence in the Reelfoot Lake area, northwestern Tennessee
(Russ, D. P.) 11: I 1013-1018
— Recurrent faulting in the vicinity of Reelfoot Lake, northwestern Tennessee
(Zoback, M. D.) 11: I 1019-1024

Mississippian *see also under* stratigraphy *under* Appalachians; Ohio

Mollusca—biostratigraphy
Quaternary: Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215

Mollusca—Bivalvia
Quaternary: Relict oysters on the United States Atlantic continental shelf; a reconsideration of their usefulness in understanding late Quaternary sea-level history; discussion and reply
(Emery, K. O., *et al.*) 7: I 689-694

Mollusca—Cephalopoda
Permian: Geology and paleontology of the Permian beds near Las Delicias, Coahuila, Mexico
(Wardlaw, B. R., *et al.*) 1: I 111-116

Mollusca—occurrence
turbidite: Black Shell turbidite, Hatteras abyssal plain, western Atlantic Ocean
(Elmore, R. D., *et al.*) 12: I 1165-1176

Mollusca—paleoecology
statistical analysis: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838

Montana—areal geology
Ruby Range: Geology and structure of the central Ruby Range, Madison County, Montana
(Garihan, J. M.) 4: I 323-326, II 695-788

Montana—structural geology
tectonics: Major tectonic elements and tectonic problems along the line of section from northeastern Oregon to West-central Montana; map summary
(Hyndman, D. W.) 8: I 715-718

mud volcanoes *see also* volcanology

Neogene *see also under* geochronology *under* New Mexico

neotectonics *see also under* structural geology *under* Arizona; Botswana; Tennessee

Nevada—geophysical surveys
gravity surveys: Deep fault trough of Oligocene age, Candelaria Hills, Nevada
(Speed, R. C., *et al.*) 2: I 145-148, II 494-527

Nevada—petrology
igneous rocks: Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062

Nevada—stratigraphy
Oligocene: Cenozoic volcanism of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 143-145, II 456-493
Permian: Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455

Nevada—structural geology
faults: Candelaria and other left-oblique slip faults of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 149-163
tectonics: Mid-Cenozoic volcano-tectonic troughs in central Nevada
(Burke, D. B., *et al.*) 2: I 181-184

New England—geomorphology
glacial geology: Regional stagnation of ice in northeastern Connecticut; an alternative model of deglaciation for part of New England; discussion and reply
(Clebnik, S. M., *et al.*) 1: I 117-120

New Jersey—stratigraphy
Ordovician: The Taconides of western New Jersey; new evidence from the Jutland Klippe; summary
(Perissoratis, C., *et al.*) 1: I 10-13, II 154-177

New Mexico—geochronology
Neogene: New K-Ar dates and the late Pliocene to Holocene geomorphic history of the central Rio Grande region, New Mexico; discussion
(Stearns, C. E.) 8: I 799-800
Proterozoic: Igneous origin of the orbicular rocks of the Sandia Mountains, New Mexico
(Enz, R. D., *et al.*) 2: I 138-140, II 349-380

New York—geochronology
Paleozoic: Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195

New York—geomorphology
glacial geology: Deglaciation events in the western Catskill Mountains, New York
(Kirkland, J. T.) 6: I 521-524
— Late Wisconsinan ice recession in East-central New York; discussion and reply
(Connally, G. G., *et al.*) 6: I 603-605

New York—structural geology
fractures: Origin of steeply inclined fractures in central and western New York State
(Wallach, J. L., *et al.*) 5: I 417-421, II 789-827

Newfoundland—tectonophysics
plate tectonics: A lower Paleozoic trench-fill sequence, New World Island, Newfoundland; discussion and reply
(Nelson, K. D., *et al.*) 10: I 985-986

Niger—stratigraphy
Cretaceous: Stratigraphic history of the South-central Saharan region
(Petters, S. W.) 8: I 753-760

Nigeria—stratigraphy
Cretaceous: Stratigraphic history of the South-central Saharan region
(Petters, S. W.) 8: I 753-760

Nigeria—structural geology
tectonics: Structural distinction between a metasedimentary cover and an underlying basement in the 600-m.y.-old Pan-African domain of northwestern Nigeria, West Africa; discussion and reply
(Mullan, H. S., *et al.*) 10: I 983-984

North America *see also* Appalachians; Atlantic Coastal Plain; Great Lakes; Great Lakes region; Mexico; Rocky Mountains; United States

North America—environmental geology
conservation: Post-industrial society, mineral resources and supplies, public policy, geology and geologists, and some central questions
(Flawn, P. T.) 3: I 232-236

North America—petrology
tektites: North American microtektites in Deep Sea Drilling Project cores from the Caribbean Sea and Gulf of Mexico
(Glass, B. P., *et al.*) 6: I 595-602

North America—stratigraphy
Mesozoic: Paleomagnetic data from the Alaska Peninsula
(Stone, D. B., *et al.*) 6: I 545-560

North America—structural geology
tectonics: The Colorado Lineament; a middle Precambrian wrench fault system; discussion and reply
(Dutch, S. I., *et al.*) 3: I 313-316

North America—tectonophysics
continental drift: Late Cenozoic subduction and continental-margin truncation along the northern Middle America Trench; discussion and reply
(Beck, M. E., Jr., *et al.*) 8: I 792-794
plate tectonics: The Colorado Lineament; a middle Precambrian wrench fault system; discussion and reply
(Hickman, M. H., *et al.*) 10: I 987-988

North Carolina—stratigraphy
Quaternary: Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215

Northern Hemisphere *see also* Africa; Atlantic Ocean; Central America; North America; Pacific Ocean

Norway—geomorphology
fluvial features: Flow competence in relation to stream channel form and braiding
(Cheetham, G. H.) 9: I 877-886

Norway—geophysical surveys
gravity surveys: Gravity interpretation of the Egersund anorthosite complex, Norway; its petrological and geothermal significance
(Smithson, S. B., *et al.*) 2: I 199-204

Norway—sedimentary petrology
sedimentation: Coarsening-upward cycles in the alluvium of Hornelen Basin (Devonian), Norway; sedimentary response to tectonic events; discussion and reply
(Garner, H. F., *et al.*) 1: I 121-124

Nova Scotia—geochemistry
trace elements: The geochemistry and origin of the Devonian granitic rocks of Southwest Nova Scotia
(Smith, T. E.) 5: I 424-426, II 850-885

Nova Scotia—petrology
igneous rocks: Origin of the plutonic mafic rocks of southern Nova Scotia
(de Albuquerque, C. A. R.) 8: I 719-731

ocean floors *see also under* oceanography *under* Brazil; Pacific Ocean

Ohio—stratigraphy
Mississippian: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838

Oklahoma—geochronology
Proterozoic: U-Pb geochronology of exposed basement rocks in Oklahoma
(Bickford, M. E., *et al.*) 6: I 540-544

Oligocene *see also under* geochronology *under* Texas; *see also under* stratigraphy *under* Lesser Antilles; Nevada

Ontario—geomorphology
meteor craters: Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Halls, H. C.) 11: I 1084-1086
— Tectonic origin for Sudbury, Ontario, shatter cones
(Fleet, M. E.) 12: I 1177-1182

ophiolite *see under* correlation *under* metamorphic rocks; *see under* metaigneous rocks *under* metamorphic rocks; *see under* ultramafic family *under* igneous rocks

Ordovician *see also under* stratigraphy *under* New Jersey

Oregon—structural geology
tectonics: Major tectonic elements and tectonic problems along the line of section from northeastern Oregon to West-central Montana; map summary
(Hyndman, D. W.) 8: I 715-718

organic materials—hydrocarbons
methane: Modern biogenic gas-generated craters (sea-floor "pockmarks") on the Bering Shelf, Alaska
(Nelson, H., *et al.*) 12: I 1144-1152

orogeny *see also* geosynclines

orogeny—absolute age
Pan-African Orogeny: Structural distinction between a metasedimentary cover and an underlying basement in the 600-m.y.-old Pan-African domain of northwestern Nigeria, West Africa; discussion and reply
(Mullan, H. S., *et al.*) 10: I 983-984

orogeny—evolution
Alpine Orogeny: Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083
Andean Orogeny: Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280

orogeny—extent
Acadian Phase: Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195
Alpine Orogeny: Alpine magmatic and metamorphic processes and plate tectonics in the Zagros Range, Iran
(Pamic, J., *et al.*) 6: I 569-576

oxygen—isotopes
O-18/O-16: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982

Pacific Coast—stratigraphy
Mesozoic: Tectonic outlier of Great Valley Sequence in Franciscan terrain, Diablo Range, California
(Bauder, J. M., *et al.*) 6: I 561-568

Pacific Coast—tectonophysics
plate tectonics: Evolution of the Late Cretaceous forearc basin, northern and central California
(Ingersoll, R. V.) 9: I 813-826
— Paleogene sediment dispersal and paleotectonics in northern California
(Dickinson, W. R., *et al.*) 10: I 897-898, II 1458-1528
— Tectonic interpretation of a geologic section of the continental margin off San Luis Obispo, the southern Coast Ranges, and the San

Joaquin Valley, California; cross-section summary
(Page, B. M., *et al.*) 9: I 808-812
— Tectonic rotations of the Santa Monica Mountains region, western Transverse Ranges, California, suggested by paleomagnetic vectors
(Kamerling, M. J., *et al.*) 4: I 331-337

Pacific Ocean *see also* Bering Sea; Gulf of California; Melanesia; Micronesia; Polynesia

Pacific Ocean—geochemistry
trace elements: Metal accumulation rates in the central equatorial Pacific during Cenozoic time
(Leinen, M., *et al.*) 4: I 357-375

Pacific Ocean—oceanography
ocean floors: Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii; visual observations from U. S. Navy deep submergence vehicle DSV Sea Cliff
(Fornari, D. J., *et al.*) 5: I 435-443
sediments: Biogenic silica accumulation in the central equatorial Pacific and its implications for Cenozoic paleoceanography
(Leinen, M.) 9: I 801-803, II 1310-1376

Pacific Ocean—stratigraphy
Eocene. Middle Eocene pelagic microfossils from the Nazca Plate
(Coulbourn, W. T., *et al.*) 7: I 634-650

Pacific Ocean—tectonophysics
plate tectonics: Cross section, Alaska Peninsula-Kodiak Island-Aleutian Trench
(von Huene, R., *et al.*) 5: I 427-430
sea-floor spreading: Subduction of the Kula Ridge at the Aleutian Trench; discussion and reply
(Farrar, E., *et al.*) 7: I 699-702

Pacific region—stratigraphy
continental drift: Paleomagnetic data from the Alaska Peninsula
(Stone, D. B., *et al.*) 6: I 545-560
Quaternary: Petrography of sand tempers in Pacific islands potsherds
(Dickinson, W. R., *et al.*) 11: I 993-995, II 1644-1701

Pacific region—tectonophysics
plate tectonics: Early Tertiary "Incaic" tectonism, uplift, and volcanic activity, Andes of central Peru
(Noble, D. C., *et al.*) 10: I 903-907
— Middle Eocene pelagic microfossils from the Nazca Plate
(Coulbourn, W. T., *et al.*) 7: I 634-650

Paleocene *see also under* stratigraphy *under* Sahara

paleoclimatology—Devonian
Norway: Coarsening-upward cycles in the alluvium of Hornelen Basin (Devonian), Norway; sedimentary response to tectonic events; discussion and reply
(Garner, H. F., *et al.*) 1: I 121-124

paleoclimatology—Holocene
Colorado: Fossil ice-wedge polygons in the Colorado Front Range; origin and significance
(Benedict, J. B.) 2: I 173-180

paleoclimatology—Quaternary
Botswana: Makgadikgadi Pans Complex of central Botswana
(Baillieul, T. A.) 2: I 133-136, II 289-312
California: Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California
(Ku, T. L., *et al.*) 11: I 1063-1073

paleoecology—Coelenterata
Oligocene: Patch-reef communities and succession in the Oligocene of Antigua, West Indies
(Frost, S. H., *et al.*) 7: I 612-616, II 1094-1141

paleoecology—Mississippian
Ohio: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838

paleoecology—Quaternary
Atlantic Coastal Plain: Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628

Paleogene *see also under* geochronology *under* Peru; *see also under* stratigraphy *under* California

paleogeography—Cretaceous
California: Evolution of the Late Cretaceous forearc basin, northern and central California
(Ingersoll, R. V.) 9: I 813-826

paleogeography—interpretation
sedimentary basins: Stratigraphic history of the South-central Saharan region
(Petters, S. W.) 8: I 753-760

paleogeography—Mesozoic
Iran: Alpine magmatic and metamorphic processes and plate tectonics in the Zagros Range, Iran
(Pamic, J., *et al.*) 6: I 569-576
North America: Paleomagnetic data from the Alaska Peninsula
(Stone, D. B., *et al.*) 6: I 545-560
Virginia: Geologic history and stratigraphy of the Triassic-Jurassic Culpeper Basin, Virginia
(Lindholm, R. C.) 11: I 995-997, II 1702-1736

paleogeography—Mississippian
Ohio: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838

paleogeography—Oligocene
Nevada: Cenozoic volcanism of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 143-145, II 456-493

paleogeography—Paleogene
California: Paleogene sediment dispersal and paleotectonics in northern California
(Dickinson, W. R., *et al.*) 10: I 897-898, II 1458-1528

paleogeography—Paleozoic
Mediterranean region: Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083

paleogeography—Permian
Great Basin: Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455

paleogeography—Quaternary
Botswana: Makgadikgadi Pans Complex of central Botswana
(Baillieul, T. A.) 2: I 133-136, II 289-312
Great Lakes: Glacial and postglacial sediments in lakes Superior and Michigan
(Lineback, J. A., *et al.*) 8: I 781-791

paleomagnetism—Cretaceous
North America: Late Cenozoic subduction and continental-margin truncation along the northern Middle America Trench; discussion and reply
(Beck, M. E., Jr., *et al.*) 8: I 792-794

paleomagnetism—Mesozoic
Appalachians: Magnetic and chemical variations of Mesozoic diabase dikes from eastern North America; evidence for a hotspot in the Carolinas?
(de Boer, J., *et al.*) 2: I 185-198

paleomagnetism—methods
demagnetization: Emplacement temperatures of unsorted and unstratified deposits of volcanic rock debris as determined by paleomagnetic techniques
(Hoblitt, R. P., *et al.*) 7: I 633-642

paleomagnetism—Miocene
California: Tectonic rotations of the Santa Monica Mountains region, western Transverse Ranges, California, suggested by paleomagnetic vectors
(Kamerling, M. J., *et al.*) 4: I 331-337

paleomagnetism—polar wandering
paleogeography: Paleomagnetic data from the Alaska Peninsula
(Stone, D. B., *et al.*) 6: I 545-560

paleomagnetism—Precambrian
Great Lakes region: Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior; discussion
(Halls, H. C.) 11: I 1084-1086

Paleozoic *see also* Cambrian; *see also under* geochronology *under* New York

Paleozoic—stratigraphy
biogeography: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

palynomorphs—miospores
Quaternary: Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628

peat *see also under* organic sediments *under* sediments

Pelecypoda *see* Bivalvia *under* Mollusca

periglacial features *see under* glacial geology

Permian *see also under* stratigraphy *under* Mexico; Nevada; Utah

Peru—geochronology
Paleogene: Early Tertiary "Incaic" tectonism, uplift, and volcanic activity, Andes of central Peru
(Noble, D. C., *et al.*) 10: I 903-907

Peru—geomorphology
landform description: The extraordinary striated outcrop at Saqsaywaman, Peru; discussion and reply
(Schopf, J. M., *et al.*) 3: I 320

petroleum *see also under* economic geology *under* Alberta

Phanerozoic *see also* Cambrian

phase equilibria—granite-granodiorite family
interpretation: Myrmekite as a marker between preaqueous and postaqueous phase saturation in granitic systems
(Hibbard, M. J.) 11: I 1047-1062

phase equilibria—mineral assemblages
interpretation: Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California
(Moore, D. E., *et al.*) 12: I 1089-1091, II 1737-1781

Pisces—biogeography
controls: Drainage evolution and fish dispersal in the central Appalachians
(Hocutt, C. H.) 2: I 129-130, II 197-234

planetology *see also* Mars

Plantae *see also* algae; angiosperms; palynomorphs; pteridophytes

plate tectonics *see also under* tectonophysics *under* Aegean Sea; Africa; Alaska; Andes; Appalachians; Australia; California; Central America; Great Basin; Gulf of California; Himalayas; Iran; Mediterranean region; Mediterranean Sea; Mexico; Newfoundland; North America; Pacific Coast; Pacific Ocean; Pacific region; Red Sea region; South America; Spain; Western U.S.

Pleistocene *see also under* geochronology *under* Barbados; Colorado; *see also under* stratigraphy *under* Michigan

plutons *see under* intrusions

Polynesia—stratigraphy
Quaternary: Petrography of sand tempers in Pacific islands potsherds
(Dickinson, W. R., *et al.*) 11: I 993-995, II 1644-1701

Proterozoic *see also under* geochronology *under* New Mexico; Oklahoma

pteridophytes—Lycopsida
Pennsylvanian: A long-leaved specimen of Lepidodendron
(Kosanke, R. M.) 5: I 431-434

Puerto Rico—geomorphology
solution features: Morphology and distribution of residual limestone hills (mogotes) in the karst of northern Puerto Rico; discussion and reply
(McDonald, R. C., *et al.*) 4: I 414-416

Quaternary *see also under* geochronology *under* Azores; California; Eastern U.S.; Hawaii; *see also under* stratigraphy *under* Great Lakes; Melanesia; Micronesia; North Carolina; Pacific region; Polynesia

Quebec—petrology
intrusions: Petrogenesis of the Mount Albert ultramafic massif, Quebec
(MacGregor, I. D., *et al.*) 10: I 898-900, II 1529-1627

Quebec—structural geology
deformation: Structure and metamorphism of the Otish Mountain area of the Grenvillian foreland zone, Quebec; summary
(Chown, E. H.) 1: I 13-15, II 178-196

radioactive dating *see* absolute age

Radiolaria—biostratigraphy
Eocene: North American microtektites in Deep Sea Drilling Project cores from the Caribbean Sea and Gulf of Mexico
(Glass, B. P., *et al.*) 6: I 595-602

rare earths—abundance
plutonic rocks: Origin of the plutonic mafic rocks of southern Nova Scotia
(de Albuquerque, C. A. R.) 8: I 719-731
volcanic rocks: Geochemistry of Brokeoff Volcano, California
(Fountain, J. C.) 3: I 294-300

Red Sea region—tectonophysics
plate tectonics: Granitic and metamorphic rocks of the Taif area, western Saudi Arabia; discussion and reply
(Church, W. R., *et al.*) 9: I 893-896

reefs *see also under* oceanography *under* West Indies; *see also under* sedimentary petrology *under* Alberta; West Indies

regional geology *see* areal geology under the appropriate area term

rock mechanics *see also* soil mechanics

rock mechanics—case studies
shear zones: Anatomy of a mining-induced fault zone
(Gay, N. C., *et al.*) 1: I 47-58

rock mechanics—deformation
fractures: Thermal expansion of fluids and fracture initiation in compacting sediments
(Domenico, P. A., *et al.*) 6: I 518-520, II 953-979

rock mechanics—theoretical studies
sliding: Mechanics of unlubricated sliding
(Chapman, R. E.) 1: I 19-28

Rocky Mountains—economic geology
uranium: Interpretation of lead-uranium ages of pitchblende deposits in the central Front Range, Colorado
(Phair, G.) 9: I 858-870

Rocky Mountains—engineering geology
slope stability: The determination of snow avalanche frequency through tree-ring analysis and historical records at Ophir, Colorado
(Carrara, P. E.) 8: I 773-780

Rocky Mountains—geomorphology
glacial geology: Rock glacier morphometry, San Juan Mountains, Colorado
(White, P. G.) 6: I 515-518, II 924-952
weathering: A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado
(Miller, C. D.) 12: I 1151-1164

Rocky Mountains—stratigraphy
Holocene: Fossil ice-wedge polygons in the Colorado Front Range; origin and significance
(Benedict, J. B.) 2: I 173-180

Rocky Mountains—structural geology
tectonics: Cenozoic faulting and sedimentation in northern San Luis Valley, Colorado; summary
(Huntley, D.) 1: I 8-10, II 135-153
— Major tectonic elements and tectonic problems along the line of section from northeastern Oregon to West-central Montana; map summary
(Hyndman, D. W.) 8: I 715-718
— The Selkirk fan structure of the southeastern Canadian Cordillera; discussion and reply
(Price, R. A., *et al.*) 7: I 695-698

Sahara—stratigraphy
Paleocene: Stratigraphic history of the South-central Saharan region
(Petters, S. W.) 8: I 753-760

Saudi Arabia—petrology
igneous rocks: Granitic and metamorphic rocks of the Taif area, western Saudi Arabia; discussion and reply
(Church, W. R., *et al.*) 9: I 893-896

sea-floor spreading *see also under* tectonophysics *under* Pacific Ocean
sedimentary rocks *see also* sedimentary structures; sedimentation; sediments
sedimentary rocks—carbonate rocks
environmental analysis: Patch-reef communities and succession in the Oligocene of Antigua, West Indies
(Frost, S. H., *et al.*) 7: I 612-616, II 1094-1141
limestone: Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike Reef, Alberta, Canada
(Walls, R. A., *et al.*) 10: I 963-982
sedimentary rocks—clastic rocks
black shale: Use of scintillometer and gamma-ray logs for correlation and stratigraphy in homogeneous black shales
(Ettensohn, F. R., *et al.*) 5: I 421-423, II 828-849
environmental analysis: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838
fanglomerate: Coarsening-upward cycles in the alluvium of Hornelen Basin (Devonian), Norway; sedimentary response to tectonic events; discussion and reply
(Garner, H. F., *et al.*) 1: I 121-124
flysch: Evolution of the Late Cretaceous forearc basin, northern and central California
(Ingersoll, R. V.) 9: I 813-826
— Overthrust emplacement of the Numidian flysch complex in the westernmost Mogod Mountains, Tunisia
(Carr, M. D., *et al.*) 6: I 513-515, II 886-923
lithofacies: Upper Mesozoic subsea fan deposits in the southern Diablo Range, California; record of the Sierra Nevada magmatic arc
(Mansfield, C. F.) 11: I 1025-1046
lithostratigraphy: Geologic history and stratigraphy of the Triassic-Jurassic Culpeper Basin, Virginia
(Lindholm, R. C.) 11: I 995-997, II 1702-1736
provenance: Origin and provenance of some exotic blocks in lower Mesozoic red-bed basin deposits, southern Arizona
(Davis, G. H., *et al.*) 4: I 376-384
turbidite: Deposition of resedimented sandstone beds in the Pico Formation, Ventura Basin, California, as interpreted from magnetic fabric measurements
(Taira, A., *et al.*) 10: I 952-962
sedimentary rocks—lithofacies
environmental analysis: A lower Paleozoic trench-fill sequence, New World Island, Newfoundland; discussion and reply
(Nelson, K. D., *et al.*) 10: I 985-986
— Lacustrine sedimentation during the culminating phase of Eocene Lake Gosiute, Wyoming (Green River Formation)
(Surdam, R. C., *et al.*) 1: I 93-110
— Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455
— Mamonia Complex, Southwest Cyprus; evolution and emplacement of a Mesozoic continental margin
(Robertson, A. H. F., *et al.*) 7: I 651-665
sedimentary rocks—properties
reservoir properties: Thermal expansion of fluids and fracture initiation in compacting sediments
(Domenico, P. A., *et al.*) 6: I 518-520, II 953-979
sedimentary structures *see also* sedimentary rocks; sediments
sedimentary structures—bedding plane irregularities
fossil ice wedges: Fossil ice-wedge polygons in the Colorado Front Range; origin and significance
(Benedict, J. B.) 2: I 173-180
sedimentary structures—environmental analysis
lakes: Lacustrine sedimentation during the culminating phase of Eocene Lake Gosiute, Wyoming (Green River Formation)
(Surdam, R. C., *et al.*) 1: I 93-110
shallow-water environment: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838
submarine fans: Upper Mesozoic subsea fan deposits in the southern Diablo Range, California; record of the Sierra Nevada magmatic arc
(Mansfield, C. F.) 11: I 1025-1046
sedimentary structures—planar bedding structures
cyclothems: Coarsening-upward cycles in the alluvium of Hornelen Basin (Devonian), Norway; sedimentary response to tectonic events; discussion and reply
(Garner, H. F., *et al.*) 1: I 121-124
sedimentary structures—soft sediment deformation
clastic dikes: Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012
sedimentary structures—turbidity current structures
graded bedding: Deposition of resedimented sandstone beds in the Pico Formation, Ventura Basin, California, as interpreted from magnetic fabric measurements
(Taira, A., *et al.*) 10: I 952-962
sedimentation—controls
structural controls: A lower Paleozoic trench-fill sequence, New World Island, Newfoundland; discussion and reply
(Nelson, K. D., *et al.*) 10: I 985-986
— Cenozoic faulting and sedimentation in northern San Luis Valley, Colorado; summary
(Huntley, D.) 1: I 8-10, II 135-153
— Evolution of the Late Cretaceous forearc basin, northern and central California
(Ingersoll, R. V.) 9: I 813-826
— Evolution of the Sao Paulo Plateau (southeastern Brazilian margin) and implications for the early history of the South Atlantic
(Kumar, N., *et al.*) 3: I 281-293
— Geologic history and stratigraphy of the Triassic-Jurassic Culpeper Basin, Virginia
(Lindholm, R. C.) 11: I 995-997, II 1702-1736
— Paleogene sediment dispersal and paleotectonics in northern California
(Dickinson, W. R., *et al.*) 10: I 897-898, II 1458-1528
sedimentation—cyclic processes
coastal environment: Evolution of Florida Bay from island stratigraphy
(Enos, P., *et al.*) 1: I 59-83
structural controls: Coarsening-upward cycles in the alluvium of Hornelen Basin (Devonian), Norway; sedimentary response to tectonic events; discussion and reply
(Garner, H. F., *et al.*) 1: I 121-124
sedimentation—deposition
troughs: Cenozoic volcanism of the Candelaria region, Nevada
(Speed, R. C., *et al.*) 2: I 143-145, II 456-493
sedimentation—environment
alluvial fans: Depositional control of aquifer characteristics in alluvial fans, Fresno County, California
(Cehrs, D.) 8: I 709-711, II 1282-1309
barrier islands: Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215
coastal environment: Barrier island development along the Alaskan-Yukon coastal plains; summary
(Short, A. D.) 1: I 3-5, II 77-103
— Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628
deep-sea environment: Metal accumulation rates in the central equatorial Pacific during Cenozoic time
(Leinen, M., *et al.*) 4: I 357-375
lakes: Glacial and postglacial sediments in lakes Superior and Michigan
(Lineback, J. A., *et al.*) 8: I 781-791
— Lacustrine sedimentation during the culminating phase of Eocene Lake Gosiute, Wyoming (Green River Formation)
(Surdam, R. C., *et al.*) 1: I 93-110
reefs: Patch-reef communities and succession in the Oligocene of Antigua, West Indies
(Frost, S. H., *et al.*) 7: I 612-616, II 1094-1141
shallow-water environment: Paleoenvironments of the Cuyahoga and Logan formations (Mississippian) of central Ohio
(Bork, K. B., *et al.*) 12: I 1091-1094, II 1782-1838

sedimentation—provenance
paleocurrents: Origin and provenance of some exotic blocks in lower Mesozoic red-bed basin deposits, southern Arizona
(Davis, G. H., *et al.*) 4: I 376-384
— Tectonic rotations of the Santa Monica Mountains region, western Transverse Ranges, California, suggested by paleomagnetic vectors
(Kamerling, M. J., *et al.*) 4: I 331-337
— Upper Mesozoic subsea fan deposits in the southern Diablo Range, California; record of the Sierra Nevada magmatic arc
(Mansfield, C. F.) 11: I 1025-1046
terrigenous materials: Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455
sedimentation—rates
volcanic ash: Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288
sedimentation—transport
marine transport: Hydraulic differentiation of heavy minerals, offshore Alabama and Mississippi
(Drummond, S. E., *et al.*) 9: I 806-807, II 1429-1457
stream transport: A sorting mechanism for a riffle-pool sequence
(Lisle, T.) 7: I 616-617, II 1142-1157
— Effect of volcanic activity on fluvial-deltaic sedimentation in a modern arc-trench gap, southwestern Guatemala
(Kuenzi, W. D., *et al.*) 9: I 827-838
— Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region; discussion and reply
(Everitt, B. L., *et al.*) 12: I 1183-1184
— The relationship between channel shape and sediment characteristics in the channel perimeter
(Miller, T. K., *et al.*) 3: I 301-304
— Threshold of critical power in streams
(Bull, W. B.) 5: I 453-464
turbidity currents: Black Shell turbidite, Hatteras abyssal plain, western Atlantic Ocean
(Elmore, R. D., *et al.*) 12: I 1165-1176
— Deposition of resedimented sandstone beds in the Pico Formation, Ventura Basin, California, as interpreted from magnetic fabric measurements
(Taira, A., *et al.*) 10: I 952-962
wind transport: Electron micrography of mineral surfaces subject to wind-blast erosion
(Whitney, M. I.) 10: I 917-934
— Intradune flats of the Algodones chain, Imperial Valley, California
(Sharp, R. P.) 10: I 908-916
sediments *see also* sedimentary rocks; sedimentary structures; sedimentation
sediments—carbonate sediments
mud: Evolution of Florida Bay from island stratigraphy
(Enos, P., *et al.*) 1: I 59-83
sediments—chemically precipitated sediments
weathering crust: Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California
(Ku, T. L., *et al.*) 11: I 1063-1073
sediments—clastic sediments
clay: Glacial and postglacial sediments in lakes Superior and Michigan
(Lineback, J. A., *et al.*) 8: I 781-791
drift: Differentiation of surficial glacial drift in southeastern Michigan from 7-A°/10-A°X-ray diffraction ratios of clays
(Rieck, R. L., *et al.*) 2: I 216-220
— Quaternary stratigraphy and chronology of Mauna Kea, Hawaii; a 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation
(Porter, S. C.) 7: I 609-611, II 980-1093
lithostratigraphy: Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina
(Susman, K. R., *et al.*) 2: I 205-215
textures: The relationship between channel shape and sediment characteristics in the channel perimeter
(Miller, T. K., *et al.*) 3: I 301-304
till: A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado
(Miller, C. D.) 12: I 1151-1164
turbidite: Black Shell turbidite, Hatteras abyssal plain, western Atlantic Ocean
(Elmore, R. D., *et al.*) 12: I 1165-1176
volcanic ash: Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288
sediments—composition
heavy minerals: Hydraulic differentiation of heavy minerals, offshore Alabama and Mississippi
(Drummond, S. E., *et al.*) 9: I 806-807, II 1429-1457
microtektites: North American microtektites in Deep Sea Drilling Project cores from the Caribbean Sea and Gulf of Mexico
(Glass, B. P., *et al.*) 6: I 595-602
sediments—environmental analysis
marine environment: Biogenic silica accumulation in the central equatorial Pacific and its implications for Cenozoic paleoceanography
(Leinen, M.) 9: I 801-803, II 1310-1376
sediments—geochemistry
metals: Metal accumulation rates in the central equatorial Pacific during Cenozoic time
(Leinen, M., *et al.*) 4: I 357-375
organic materials: Modern biogenic gas-generated craters (sea-floor "pockmarks") on the Bering Shelf, Alaska
(Nelson, H., *et al.*) 12: I 1144-1152
sediments—organic sediments
peat: Upper Quaternary peat deposits on the Atlantic inner shelf of the United States
(Field, M. E., *et al.*) 7: I 618-628
sediments—properties
permeability: Depositional control of aquifer characteristics in alluvial fans, Fresno County, California
(Cehrs, D.) 8: I 709-711, II 1282-1309
sediments—textures
surface textures: Electron micrography of mineral surfaces subject to wind-blast erosion
(Whitney, M. I.) 10: I 917-934
seismic surveys *see under* geophysical surveys *under* Atlantic Ocean; Bering Sea; Tennessee
seismology—seismicity
seismotectonics: Holocene faulting in the western Grand Canyon, Arizona; discussion and reply
(Anderson, R. E., *et al.*) 2: I 221-224
— Late Holocene faulting and earthquake recurrence in the Reelfoot Lake area, northwestern Tennessee
(Russ, D. P.) 11: I 1013-1018
— Recurrent faulting in the vicinity of Reelfoot Lake, northwestern Tennessee
(Zoback, M. D.) 11: I 1019-1024
shear zones *see under* effects *under* faults
shore features *see under* geomorphology
silicates *see under* minerals
slope stability *see also* geomorphology; *see also under* engineering geology *under* Rocky Mountains
slope stability—theoretical studies
sliding: Mechanics of unlubricated sliding
(Chapman, R. E.) 1: I 19-28
soil mechanics *see also* rock mechanics
soil mechanics—deformation
fractures: Thermal expansion of fluids and fracture initiation in compacting sediments
(Domenico, P. A., *et al.*) 6: I 518-520, II 953-979
soils—surveys
California: Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California
(Ku, T. L., *et al.*) 11: I 1063-1073

Solomon Islands—petrology
igneous rocks: Ophiolite complexes on Small Nggela Island, Solomon Islands
(Neef, G., *et al.*) 2: I 136-138, II 313-348
South Africa—engineering geology
underground installations: Anatomy of a mining-induced fault zone
(Gay, N. C., *et al.*) 1: I 47-58
South America *see also* Andes; Argentina; Brazil; Chile; Peru
South America—tectonophysics
plate tectonics: Evolution of the Sao Paulo Plateau (southeastern Brazilian margin) and implications for the early history of the South Atlantic
(Kumar, N., *et al.*) 3: I 281-293
— Geochemistry of Mesozoic marginal basin floor igneous rocks from southern Chile
(Saunders, A. D., *et al.*) 3: I 237-258
— Middle Eocene pelagic microfossils from the Nazca Plate
(Coulbourn, W. T., *et al.*) 7: I 634-650
— Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280
Southern Hemisphere *see also* Africa; Antarctica; Atlantic Ocean; Indian Ocean; Pacific Ocean; South America
Spain—tectonophysics
plate tectonics: Pre-Triassic fit and Alpine tectonics of continental blocks in the western Mediterranean
(Bourrouilh, R., *et al.*) 11: I 1074-1083
springs *see also* ground water
structural analysis *see also* folds; foliation; lineation
structural analysis—faults
interference patterns: Structure and metamorphism of the Otish Mountain area of the Grenvillian foreland zone, Quebec; summary
(Chown, E. H.) 1: I 13-15, II 178-196
structural analysis—folds
interference patterns: "Eyed folds" in Precambrian marbles from southeastern Rajasthan, India
(Mukhopadhyay, D., *et al.*) 4: I 397-404
— The Taconides of western New Jersey; new evidence from the Jutland Klippe; summary
(Perissoratis, C., *et al.*) 1: I 10-13, II 154-177
structural analysis—foliation
interference patterns: Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York
(Brock, P. W. G., *et al.*) 8: I 705-707, II 1158-1195
— The Selkirk fan structure of the southeastern Canadian Cordillera; discussion and reply
(Price, R. A., *et al.*) 7: I 695-698
structural analysis—fractures
conical fractures: Tectonic origin for Sudbury, Ontario, shatter cones
(Fleet, M. E.) 12: I 1177-1182
structural analysis—interpretation
interference patterns: Ages of deposition, deformation, and intrusion of Cretaceous rocks, eastern St. Croix, Virgin Islands
(Speed, R. C., *et al.*) 7: I 629-632
— Progressive deformation and orogenic uplift at the southern extremity of the Andes
(Dalziel, I. W. D., *et al.*) 3: I 259-280
— Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego
(Bruhn, R. L.) 11: I 998-1012
melange: A lower Paleozoic trench-fill sequence, New World Island, Newfoundland; discussion and reply
(Nelson, K. D., *et al.*) 10: I 985-986
— Kaweah serpentinite melange, Southwest Sierra Nevada foothills, California
(Saleeby, J.) 1: I 29-46
— Role of the Melones fault zone in the structural chronology of the North Yuba River area, western Sierra Nevada, California
(Cebull, S. E., *et al.*) 3: I 225-227, II 528-544
petrofabrics: Deformation and metamorphism in the Hylas Zone and adjacent parts of the eastern Piedmont in Virginia
(Bobyarchick, A. R., *et al.*) 8: I 739-752
— Dolomite and quartz lamellae stress and strain analysis in a multiply-deformed terrane, West-central Vermont
(Detenbeck, J. C., *et al.*) 9: I 804-805, II 1377-1428
— Structural distinction between a metasedimentary cover and an underlying basement in the 600-m.y.-old Pan-African domain of northwestern Nigeria, West Africa; discussion and reply
(Mullan, H. S., *et al.*) 10: I 983-984
shear zones: Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
structural analysis—lineation
boudinage: Deformation at various scales in the South Mountain Anticlinorium of the central Appalachians
(Mitra, S.) 3: I 227-229, II 545-579
structural analysis—methods
statistical methods: Transition analysis of structural sequences; discussion and reply
(Turk, G., *et al.*) 10: I 989-992
structural analysis—preferred orientation
diagrams: Estimating densities in contoured orientation diagrams
(Ramsden, J., *et al.*) 3: I 229-231, II 580-607
structural analysis—theoretical studies
eigenvalues: Specification of fabric shapes using an eigenvalue method; discussion
(Cobbold, P. R., *et al.*) 3: I 310-312
fold axes: Analysis of rotation of folds during progressive deformation
(Ramsay, D. M.) 8: I 732-738
structural geology—methods
statistical methods: Estimating densities in contoured orientation diagrams
(Ramsden, J., *et al.*) 3: I 229-231, II 580-607
structural petrology *see* structural analysis
tectonics *see also* faults; folds; geosynclines; orogeny; structural analysis; *see also under* structural geology *under* Africa; Andes; Appalachians; Argentina; Arizona; Basin and Range Province; British Columbia; California; Chile; Colorado; Ghana; Greater Antilles; Greece; Mediterranean region; Montana; Nevada; Nigeria; North America; Oregon; Rocky Mountains; Tunisia; Utah; Virginia; Western U.S.
tectonics—gravity sliding
theoretical studies: Mechanics of unlubricated sliding
(Chapman, R. E.) 1: I 19-28
tektites *see also under* petrology *under* Australia; North America
Tennessee—geophysical surveys
seismic surveys: Recurrent faulting in the vicinity of Reelfoot Lake, northwestern Tennessee
(Zoback, M. D.) 11: I 1019-1024
Tennessee—structural geology
neotectonics: Late Holocene faulting and earthquake recurrence in the Reelfoot Lake area, northwestern Tennessee
(Russ, D. P.) 11: I 1013-1018
— Recurrent faulting in the vicinity of Reelfoot Lake, northwestern Tennessee
(Zoback, M. D.) 11: I 1019-1024
tephrochronology *see under* geochronology
Tertiary *see also under* stratigraphy *under* Alaska; Mediterranean region
Texas—geochronology
Oligocene: K-Ar geochronology of Oligocene volcanic rocks, Davis and Barrilla mountains, Texas
(Parker, D. F., *et al.*) 12: I 1100-1110
thrust faults *see under* displacements *under* faults
trace elements *see under* geochemistry *under* British Columbia; California; Chile; lava; magmas; Nova Scotia; Pacific Ocean; Washington
Triassic *see also under* stratigraphy *under* Virginia
Trilobita—biogeography
Cambrian: Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift
(Taylor, M. E., *et al.*) 4: I 405-413

Tunisia—structural geology
tectonics: Overthrust emplacement of the Numidian flysch complex in the westernmost Mogod Mountains, Tunisia
(Carr, M. D., *et al.*) 6: I 513-515, II 886-923

turbidity current structures *see under* sedimentary structures

underground installations *see also under* engineering geology *under* South Africa

underground water *see* ground water

United States *see also* the individual states and regions

United States—economic geology
mineral resources: Post-industrial society, mineral resources and supplies, public policy, geology and geologists, and some central questions
(Flawn, P. T.) 3: I 232-236

uranium *see also under* economic geology *under* Colorado; Rocky Mountains

Utah—petrology
lava: Petrology of the Marysvale volcanic field, Utah; summary
(Wender, L. E., *et al.*) 1: I 2-3, II 34-76

Utah—stratigraphy
Permian: Lower Permian of the central Cordilleran Miogeosyncline
(Stevens, C. H.) 2: I 140-142, II 381-455

Utah—structural geology
tectonics: Oligocene and Miocene metamorphism, folding, and low-angle faulting in northwestern Utah; discussion and reply
(Crittenden, M. D., Jr., *et al.*) 3: I 305-309

Vermont—geochemistry
fluid inclusions: Fluid inclusion evidence for Silurian evaporites in southeastern Vermont
(Rich, R. A.) 10: I 901-902, II 1628-1643

Vermont—structural geology
deformation: Dolomite and quartz lamellae stress and strain analysis in a multiply-deformed terrane, West-central Vermont
(Detenbeck, J. C., *et al.*) 9: I 804-805, II 1377-1428

Vertebrata *see also* fossil man; Pisces

Virginia—stratigraphy
Triassic: Geologic history and stratigraphy of the Triassic-Jurassic Culpeper Basin, Virginia
(Lindholm, R. C.) 11: I 995-997, II 1702-1736

Virginia—structural geology
deformation: Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains
(Mitra, G.) 10: I 935-951
tectonics: Deformation and metamorphism in the Hylas Zone and adjacent parts of the eastern Piedmont in Virginia
(Bobyarchick, A. R., *et al.*) 8: I 739-752
— Similarities between the thick-skinned Blue Ridge anticlinorium and the thin-skinned Powell Valley Anticline
(Harris, L. D.) 6: I 525-539

volcanic features *see under* geomorphology

volcanism *see under* volcanology

volcanoes *see under* volcanology

volcanology—volcanism
age: Early Tertiary "Incaic" tectonism, uplift, and volcanic activity, Andes of central Peru
(Noble, D. C., *et al.*) 10: I 903-907
— K-Ar geochronology of Oligocene volcanic rocks, Davis and Barrilla mountains, Texas
(Parker, D. F., *et al.*) 12: I 1100-1110
evolution: The record of Cenozoic volcanism around the Gulf of California
(Gastil, G., *et al.*) 9: I 839-857
island arcs: Ophiolite and island-arc volcanism in Costa Rica
(Galli-Olivier, C.) 5: I 444-452
migration: Magnetic and chemical variations of Mesozoic diabase dikes from eastern North America; evidence for a hotspot in the Carolinas?
(de Boer, J., *et al.*) 2: I 185-198
— Mid-Cenozoic volcano-tectonic troughs in central Nevada
(Burke, D. B., *et al.*) 2: I 181-184

volcanology—volcanoes
Azores: Deep-sea tephra from the Azores during the past 300,000 years; eruptive cloud height and ash volume estimates
(Huang, T. C., *et al.*) 2: I 131-133, II 235-288
Hawaii: Volcanic structure of the crest of the Puna Ridge, Hawaii; geophysical implications of submarine volcanic terrain; discussion and reply
(Goldie, R. J., *et al.*) 7: I 703-704
Mauna Kea: Quaternary stratigraphy and chronology of Mauna Kea, Hawaii; a 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation
(Porter, S. C.) 7: I 609-611, II 980-1093
Mauna Loa: Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii; visual observations from U. S. Navy deep submergence vehicle DSV Sea Cliff
(Fornari, D. J., *et al.*) 5: I 435-443
Mount Saint Helens: Emplacement temperatures of unsorted and unstratified deposits of volcanic rock debris as determined by paleomagnetic techniques
(Hoblitt, R. P., *et al.*) 7: I 633-642

Washington—geochemistry
trace elements: Plagiogranite and keratophyre in ophiolite on Fidalgo Island, Washington
(Brown, E. H., *et al.*) 5: I 493-507

Washington—petrology
metamorphism: Genesis of the Skagit Gneiss migmatites, Washington, and the distinction between possible mechanisms of migmatization; discussion and reply
(Ashworth, J. R., *et al.*) 9: I 887-888

Washington—volcanology
Mount Saint Helens: Emplacement temperatures of unsorted and unstratified deposits of volcanic rock debris as determined by paleomagnetic techniques
(Hoblitt, R. P., *et al.*) 7: I 633-642

waterways—rivers and streams
experimental studies: A study of stream braiding
(Hong, L. B., *et al.*) 12: I 1094-1095, II 1839-1859
hydraulics: A sorting mechanism for a riffle-pool sequence
(Lisle, T.) 7: I 616-617, II 1142-1157

weathering *see also under* geomorphology *under* California; Rocky Mountains

well-logging—radioactivity
applications: Use of scintillometer and gamma-ray logs for correlation and stratigraphy in homogeneous black shales
(Ettensohn, F. R., *et al.*) 5: I 421-423, II 828-849

West Indies *see also* Barbados; Greater Antilles; Lesser Antilles; Puerto Rico

West Indies—geochronology
Cretaceous: Ages of deposition, deformation, and intrusion of Cretaceous rocks, eastern St. Croix, Virgin Islands
(Speed, R. C., *et al.*) 7: I 629-632

West Indies—oceanography
reefs: Uranium-series dating of the Pleistocene reef tracts of Barbados, West Indies
(Bender, M. L., *et al.*) 6: I 577-594

West Indies—sedimentary petrology
reefs: Patch-reef communities and succession in the Oligocene of Antigua, West Indies
(Frost, S. H., *et al.*) 7: I 612-616, II 1094-1141

West Virginia—paleobotany
pteridophytes: A long-leaved specimen of Lepidodendron
(Kosanke, R. M.) 5: I 431-434

Western Hemisphere *see also* Atlantic Ocean; Central America; North America; Pacific Ocean; South America

Western U.S.—structural geology
tectonics: The Colorado Lineament; a middle Precambrian wrench fault system; discussion and reply
(Dutch, S. I., *et al.*) 3: I 313-316

Western U.S.—tectonophysics
plate tectonics: Saline water in the foothill suture zone, Sierra Nevada Range, California
(Mack, S., *et al.*) 7: I 666-675

Wyoming—stratigraphy
Eocene: Lacustrine sedimentation during the culminating phase of Eocene Lake Gosiute, Wyoming (Green River Formation)
(Surdam, R. C., *et al.*) 1: I 93-110

X-ray analysis—X-ray diffraction analysis
applications: Differentiation of surficial glacial drift in southeastern Michigan from 7-Aº/10-AºX-ray diffraction ratios of clays
(Rieck, R. L., *et al.*) 2: I 216-220

X-ray diffraction analysis *see under* X-ray analysis

Yukon Territory—geomorphology
shore features: Barrier island development along the Alaskan-Yukon coastal plains; summary
(Short, A. D.) 1: I 3-5, II 77-103

ERRATA

Volume 90

Page 160, left column, first paragraph under KINEMATIC MODEL, line 17, add "Ambrayses, 1970; Wilcox and others, 1973; and Tchalenko and".

Pages 260 and 277, Figures 1 and 13A are reproduced on the following two pages to distinguish patterns more clearly.

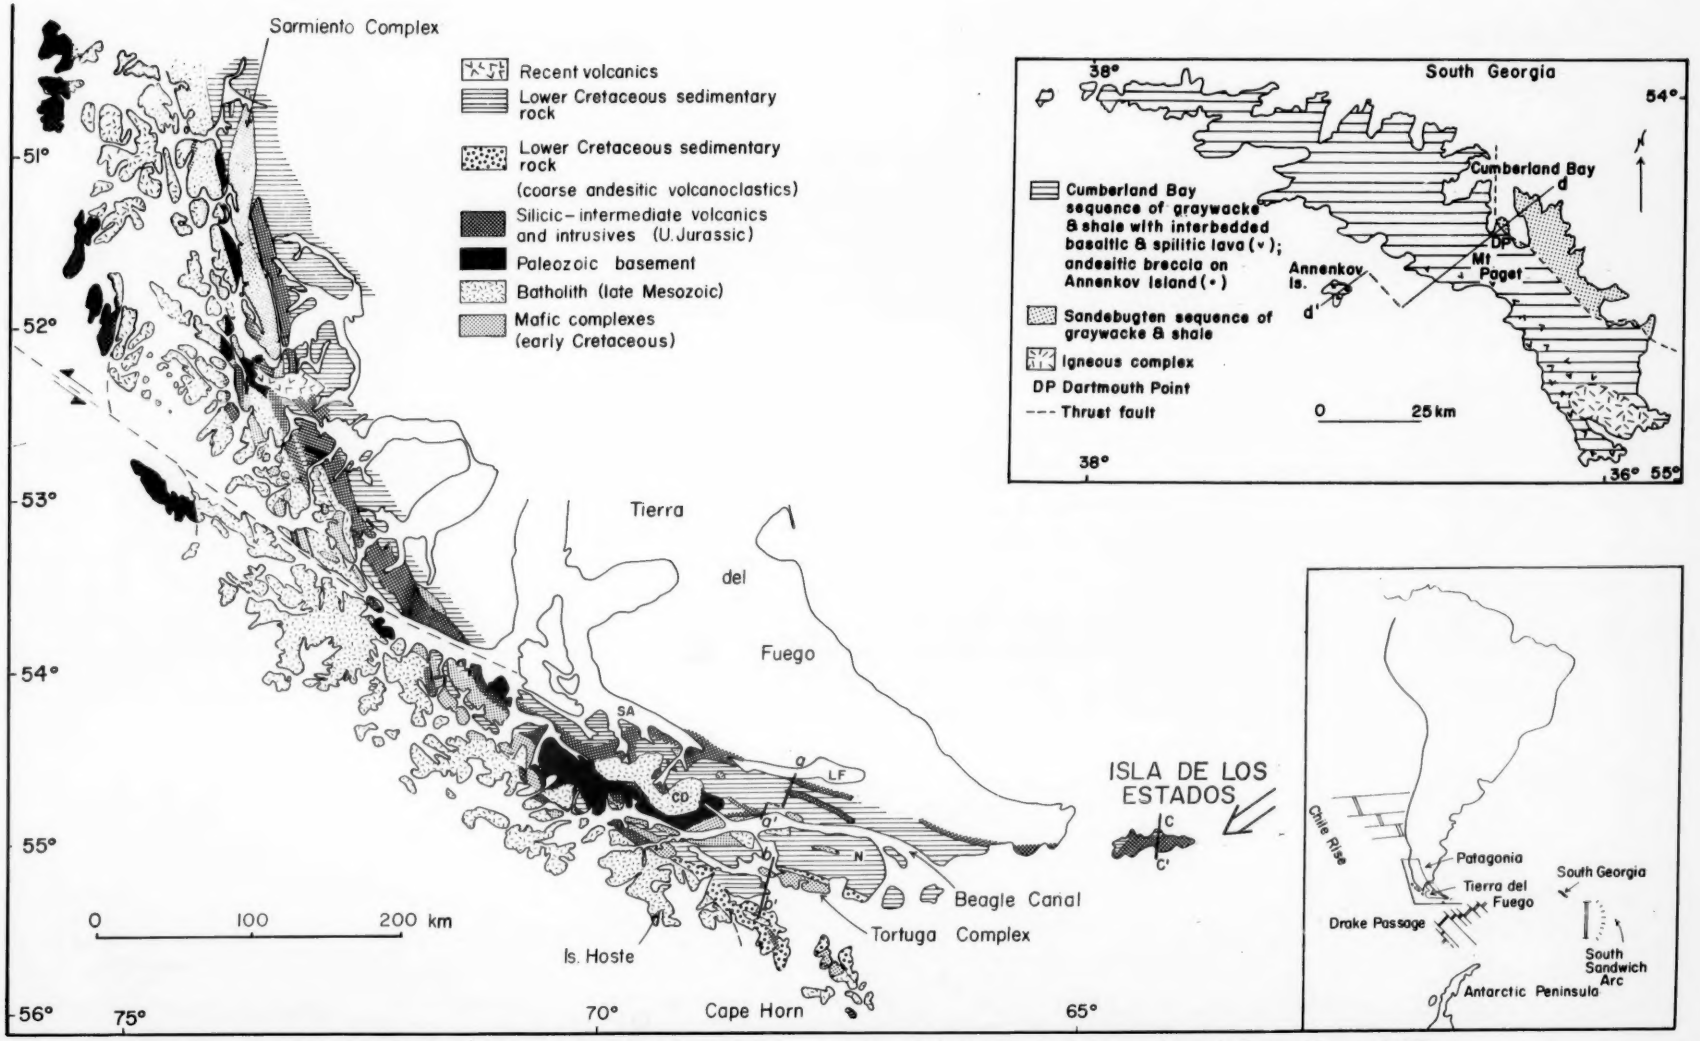

Figure 1. Simplified geologic map of southern South America; a–a′ through d–d′ are lines of sections shown in Figure 13, part A. CD = Cordillera Darwin, LF = Lago Fagnano, N = Isla Navarino, SA = Seno Almirantazgo.

A

Figure 13A. Structural sections across Andean Cordillera in central Tierra del Fuego, and across Isla de los Estados and South Georgia Island (after Bruhn, 1976; Dalziel and others, 1975b; Dalziel and Palmer, this paper). See Figure 1 for location.

JANUARY

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Geology in China: Summary .... *Charles L. Drake* 1–2

Petrology of Oligocene and early Miocene calc-alkalic volcanism in the Marysvale area, Utah: Summary .... *L. E. Wender and W. P. Nash* 2–3

Barrier island development along the Alaskan-Yukon coastal plains: Summary .... *A. D. Short* 3–5

Comparison of spatially filtered geologic maps: Summary ..... *T. R. Eschner, J. E. Robinson, and D. F. Merriam* 6–7

Cenozoic faulting and sedimentation in northern San Luis Valley, Colorado: Summary ..... *David Huntley* 8–10

The Taconides of western New Jersey: New evidence from the Jutland Klippe: Summary ..... *Constantine Perissoratis, P.W.G. Brock, H. K. Brueckner, Avery Ala Drake, Jr., and W.B.N. Berry* 10–13

Structure and metamorphism of the Otish Mountain area of the Grenvillian Foreland Zone, Québec: Summary .... *E. H. Chown* 13–15

MAP SUMMARY

Reconnaissance geology of west-central Nayarit, Mexico: Summary .... *Gordon Gastil, Daniel Krummenacher, and Wallace A. Jensky II* 15–18
(Map summary, GSA Map and Chart Ser. MC-24)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Mechanics of unlubricated sliding .... *Richard E. Chapman* 19–28

Kaweah serpentinite mélange, southwest Sierra Nevada foothills, California .... *Jason Saleeby* 29–46

Anatomy of a mining-induced fault zone .... *N. C. Gay and W. D. Ortlepp* 47–58

Evolution of Florida Bay from island stratigraphy ..... *Paul Enos and Ronald D. Perkins* 59–83

Aegean and surrounding regions: Complex multiplate and continuum tectonics in a convergent zone .... *A. M. Celâl Şengör and J. F. Dewey* 84–92

Lacustrine sedimentation during the culminating phase of Eocene Lake Gosiute, Wyoming (Green River Formation) .... *Ronald C. Surdam and K. O. Stanley* 93–110

Geology and paleontology of the Permian beds near Las Delicias, Coahuila, Mexico ..... *Bruce R. Wardlaw, William M. Furnish, and Merlynd K. Nestell* 111–116

Regional stagnation of ice in northeastern Connecticut: An alternative model of deglaciation for part of New England: Discussion and reply
Discussion ..... *S. M. Clebnik and J. W. Mulholland*
Reply ..... *Robert F. Black* 117–120

Coarsening-upward cycles in the alluvium of Hornelen Basin (Devonian), Norway: Sedimentary response to tectonic events: Discussion and reply
Discussion ..... *H. F. Garner*
Reply ..... *R. J. Steel, S. Maehle, H. Nilsen, S-L. Roe, and Å. Spinnangr* 121–124

Structural evolution of the Vardar root zone, northern Greece: Discussion and reply
Discussion ..... *C. M. Barton*
Reply ..... *Jay Zimmerman and John V. Ross* 125–128

FEBRUARY

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Drainage evolution and fish dispersal in the central Appalachians: Summary .... *Charles H. Hocutt* 129–130

Deep-sea tephra from the Azores during the past 300,000 years: Eruptive cloud height and ash volume estimates: Summary ..... *T. C. Huang, N. D. Watkins, and L. Wilson* 131–133

Makgadikgadi Pans Complex of central Botswana: Summary .... *Thomas A. Baillieul* 133–136

Ophiolite complexes on Small Nggela Island, Solomon Islands: Summary .... *G. Neef and I. R. Plimer* 136–138

Igneous origin of the orbicular rocks of the Sandia Mountains, New Mexico: Summary ..... *Robert D. Enz, Albert M. Kudo, and Douglas G. Brookins* 138–140

Lower Permian of the central Cordilleran Miogeosyncline: Summary .... *Calvin H. Stevens* 140–142

Cenozoic volcanism of the Candelaria region, Nevada: Summary .... *R. C. Speed and Allen H. Cogbill* 143–145

Deep fault trough of Oligocene age, Candelaria Hills, Nevada: Summary .... *R. C. Speed and Allen H. Cogbill* 145–148

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Candelaria and other left-oblique slip faults of the Candelaria region, Nevada .... *R. C. Speed and Allen H. Cogbill* 149–163

Topology of ridge patterns: Randomness and constraints ..... *David M. Mark* 164–172

Fossil ice-wedge polygons in the Colorado Front Range: Origin and significance ... . *J. B. Benedict* 173–180

Mid-Cenozoic volcano-tectonic troughs in central Nevada ..... *Dennis B. Burke and Edwin H. McKee* 181–184

Magnetic and chemical variations of Mesozoic diabase dikes from eastern North America: Evidence for a hotspot in the Carolinas? ..... *Jelle De Boer and Frederic G. Snider* 185–198

Gravity interpretation of the Egersund anorthosite complex, Norway: Its petrological and geothermal significance ..... *Scott B. Smithson and Ivar B. Ramberg* 199–204

Evolution of a barrier island, Shackleford Banks, Carteret County, North Carolina ..... *Kenneth R. Susman and S. Suncan Heron, Jr.* 205–215

Differentiation of surficial glacial drift in southeastern Michigan from 7-Å/10-Å X-ray diffraction ratios of clays ..... *Richard L. Rieck, Harold A. Winters, Delbert L. Mokma, and Max M. Mortland* 216–220

Holocene faulting in the western Grand Canyon, Arizona: Discussion and reply Discussion ..... *R. Ernest Anderson* Reply ..... *Peter W. Huntoon* 221–224

MARCH

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Role of the Melones fault zone in the structural chronology of the North Yuba River area, western Sierra Nevada, California: Summary ..... *S. E. Cebull and L. R. Russell* 225–227

Deformation at various scales in the South Mountain anticlinorium of the central Appalachians: Summary .... *Shankar Mitra* 227–229

Estimating densities in contoured orientation diagrams: Summary ... *J. Ramsden and D. M. Cruden* 229–231

Geological Society of America Medals and Awards for 1978 231

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Post-industrial society, mineral resources and supplies, public policy, geology and geologists, and some central questions .... *Peter T. Flawn* 232–236

Geochemistry of Mesozoic marginal basin floor igneous rocks from southern Chile .... *Andrew D. Saunders, John Tarney, Charles R. Stern, and Ian W. D. Dalziel* 237–258

Progressive deformation and orogenic uplift at the southern extremity of the Andes .... *Ian W. D. Dalziel and Keith F. Palmer* 259–280

Evolution of the São Paulo Plateau (southeastern Brazilian margin) and implications for the early history of the South Atlantic ..... *Naresh Kumar and L.A.P. Gambôa* 281–293

Geochemistry of Brokeoff volcano, California ..... *John C. Fountain* 294–300

The relationship between channel shape and sediment characteristics in the channel perimeter ..... *Theodore K. Miller and Lawrence J. Onesti* 301–304

Oligocene and Miocene metamorphism, folding, and low-angle faulitng in northwestern Utah: Discussion and reply
Discussion ..... *Max D. Crittenden, Jr.*
Reply ..... *Robert R. Compton and Victoria R. Todd* 305–309

Specification of fabric shapes using an eigenvalue method: Discussion .... *P. R. Cobbold and D. Gapais* 310–312

The Colorado Lineament: A middle Precambrian wrench fault system: Discussion and reply
Discussion ..... *Steven I. Dutch*
Reply ..... *Lawrence A. Warner* 313–316

Vertical tectonics in the middle Himalayas: An appraisal from recent gravity data: Discussion and reply
Discussion ..... *Subimal Sinha Roy*
Reply ..... *M. N. Qureshy* 317–319

The extraordinary straited outcrop at Saqsaywamán, Peru: Discussion and reply
Discussion ..... *James M. Schopf*
Reply ..... *Tomas Feininger* 320

APRIL

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Origin and emplacement of the Academy Pluton, Fresno County, California: Summary ..... *Seymour Mack, Jason B. Saleeby, and John E. Ferrell* 321–323
(Complete article in *Part II,* card 1, p. 633–694)

Geology and structure of the central Ruby Range, Madison County, Montana: Summary ..... *John M. Garihan* 323–326
(Complete article in *Part II,* card 2, p. 695–788)

MAP SUMMARY

Structural interpretation of the southern part of the northern Coast Ranges and Sacramento Valley, California: Summary ..... *John Suppe* 327–330
(Map summary, GSA Map and Chart Ser. MC-28B)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Tectonic rotations of the Santa Monica Mountains region, western Transverse Ranges, California, suggested by paleomagnetic vectors ..... *Marc J. Kamerling and Bruce P. Luyendyk* 331–337

Neogene tectonic evolution of the California Continental Borderland and western Transverse Ranges ... *James K. Crouch* 338–345

Chemical variation within the Coast Plutonic Complex of British Columbia between lat 53° and 55°N ..... *T. E. Smith, Chris Riddle, and T. A. Jackson* 346–356

Metal accumulation rates in the central equatorial Pacific during Cenozoic time ..... *Margaret Leinen and Debra Stakes* 357–375

Origin and provenance of some exotic blocks in lower Mesozoic red-bed basin deposits, southern Arizona ..... *G. H. Davis, M. P. Phillips, S. J. Reynolds, and R. J. Varga* 376–384

Quantitative morphology of landforms in carbonate rock basins in the Appalachian Highlands ..... *Elizabeth L. White and William B. White* 385–396

"Eyed folds" in Precambrian marbles from southeastern Rajasthan, India ..... *Dhruba Mukhopadhyay and Subhashish Sengupta* 397–404

Distributional model for marine isopod crustaceans and its bearing on early Paleozoic paleozoogeography and continental drift ..... *Michael E. Taylor and Richard M. Forester* 405–413

Morphology and distribution of residual limestone hills (mogotes) in the karst of northern Puerto Rico: Discussion and reply
Discussion ..... *Roy Charles McDonald*
Reply ..... *Michael J. Day* 414–416

MAY

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Origin of steeply inclined fractures in central and western New York State: Summary ..... *Joseph L. Wallach and John L. Prucha* 417–421
(Complete article in *Part II*, Card 1, p. 789–827)

Use of scintillometer and gamma-ray logs for correlation and stratigraphy in homogenous black shales: Summary ..... *Frank R. Ettensohn, Linda Provo Fulton, and Roy C. Kepferle* 421–423
(Complete article in *Part II*, Card 1, p. 828–849)

The geochemistry and origin of the Devonian granitic rocks of southwest Nova Scotia: Summary ..... *T. E. Smith* 424–426
(Complete article in *Part II*, Card 2, p. 850–885)

MAP SUMMARY

Cross section, Alaska Peninsula–Kodiak Island–Aleutian Trench: Summary ..... *Roland von Huene, George W. Moore, J. Casey Moore, and Christopher D. Stephens* 427–430
(Map summary, GSA Map and Chart Ser. MC-28A)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

A long-leaved specimen of *Lepidodendron* .. .. *Robert M. Kosanke* 431–434

Submarine extension of the southwest rift zone of Mauna Loa Volcano, Hawaii: Visual observations from U.S. Navy deep submergence vehicle *DSV Sea Cliff* ..... *Daniel J. Fornari Donald W. Peterson, John P. Lockwood, Alexander Malahoff, and Bruce C. Heezen* 435–443

Ophiolite and island-arc volcanism in Costa Rica ..... *Carlos Galli-Olivier* 444–452

Threshold of critical power in streams ..... *William B. Bull* 453–464

Crystallization, fractionation, and solidification of the Tuolumne Intrusive Series, Yosemite National Park, California .... *Paul C. Bateman and Bruce W. Chappell* 465–482

Shear heating at the Olympos (Greece) thrust and the deformation properties of carbonates at geological strain rates ..... *C. M. Barton and P. C. England* 483–492

Plagiogranite and keratophyre in ophiolite on Fidalgo Island, Washington ..... *E. H. Brown, J. Y. Bradshaw, and G. E. Mustoe* 493–507

Australasian microtektites and the stratigraphic age of the australites: Discussion and reply
Discussion ..... *R. O. Chalmers, E. P. Henderson, and Brian Mason*
Reply ..... *B. P. Glass* 508–512

JUNE

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Overthrust emplacement of the Numidian Flysch Complex in the westernmost Mogod Mountains, Tunisia: Summary ..... *Michael D. Carr and Elizabeth L. Miller* 513–515
(Complete article in *Part II,* Card 1, p. 886–923)

Rock glacier morphometry, San Juan Mountains, Colorado: Summary ..... *P. Gary White* 515–518
(Complete article in *Part II,* Card 1, p. 924–952)

Thermal expansion of fluids and fracture initiation in compacting sediments: Summary ..... *P. A. Domenico and V. V. Palciauskas* 518–520
(Complete article in *Part II,* Card 2, p. 953–979)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Deglaciation events in the western Catskill Mountains, New York ..... *James T. Kirkland* 521–524

Similarities between the thick-skinned Blue Ridge anticlinorium and the thin-skinned Powell Valley anticline ..... *Leonard D. Harris* 525–539

U-Pb geochronology of exposed basement rocks in Oklahoma .... *M. E. Bickford and Richard D. Lewis* 540–544

Paleomagnetic data from the Alaska Peninsula ..... *D. B. Stone and D. R. Packer* 545–560

Tectonic outlier of Great Valley sequence in Franciscan terrain, Diablo Range, California ..... *Janet M. Bauder and J. G. Liou* 561–568

Alpine magmatic and metamorphic processes and plate tectonics in the Zagros Range, Iran .. *J. Pamić, G. Sestini, and D. Adib* 569–576

Uranium-series dating of the Pleistocene reef tracts of Barbados, West Indies ..... *Michael L. Bender, Richard G. Fairbanks, F. W. Taylor, R. K. Matthews, John G. Goddard, and Wallace S. Broecker* 577–584

North American microtektites in Deep Sea Drilling Project cores from the Caribbean Sea and Gulf of Mexico .... *B. P. Glass and M. J. Zwart* 595–602

Late Wisconsinan ice recession in east-central New York: Discussion and reply
Discussion ..... *G. Gordon Connally*
Reply ..... *Donald B. Krall* 603–605

Stream network volume: An index of channel morphometry: Discussion and reply
Discussion ..... *Rob Ferguson*
Reply ..... *K. J. Gregory* 606–608

JULY

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Quarternary stratigraphy and chronology of Mauna Kea, Hawaii: A 380,000-yr record of mid-Pacific volcanism and ice-cap glaciation: Summary ..... *Stephen C. Porter* 609–611
(Complete article in *Part II,* Cards 1 and 2 p. 980–1093)

Patch-reef communities and succession in the Oligocene of Antigua, West Indies: Summary ..... *S. H. Frost and M. P. Weiss* 612–616
(Complete article in *Part II,* Card 2, p. 1094–1141)

A sorting mechanism for a riffle-pool sequence: Summary ..... *Thomas Lisle* 616–617
(Complete article in *Part II,* Card 2, p. 1142–1157)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Upper Quaternary peat deposits on the Atlantic inner shelf of the United States ..... *Michael E. Field, Edward P. Meisburger, Edward A. Stanley, and S. Jeffress Williams* 618–628

Ages of deposition, deformation, and intrusion of Cretaceous rocks, eastern St. Croix, Virgin Islands ..... *R. C. Speed, Lee C. Gerhard, and E. H. McKee* 629–632

Emplacement temperatures of unsorted and unstratified deposits of volcanic rock debris as determined by paleomagnetic techniques ..... *Richard P. Hoblitt and Karl S. Kellogg* 633–642

Middle Eocene pelagic microfossils from the Nazca Plate ..... *William T. Coulbourn and Johanna M. Resig* 643–650

Mamonia Complex, southwest Cyprus: Evolution and emplacement of a Mesozoic continental margin ..... *A.H.F. Robertson and N. H. Woodcock* 651–665

Saline water in the foothill suture zone, Sierra Nevada Range, California ..... *Seymour Mack and Lorraine M. Ferrell* 666–675

Geology and petrology of the McMurdo Volcanic Group at Rainbow Ridge, Brown Peninsula, Antarctica ... *Philip R. Kyle, John Adams, and Peter C. Rankin* 676–688

Relict oysters on the United States Atlantic continental shelf: A reconsideration of their usefulness in undertsanding late Quaternary sea-level history: Disucssion and reply
Discussion ..... *K. O. Emery and A. S. Merrill*
Reply ..... *Ian G. Macintyre, Orrin H. Pilkey, and Robert Stuckenrath* 689–694

The Selkirk fan structure of the southeastern Canadian Cordillera: Discussion and reply
Discussion ..... *Raymond A. Price*
Reply ..... *Richard L. Brown and Clinton R. Tippett* 695–698

Subduction of the Kula Ridge at the Aleutian Trench: Discussion and reply
Discussion ..... *Edward Farrar and John M. Dixon*
Reply ..... *Stephen E. DeLong, Paul J. Fox, and Fred W. McDowell* 699–702

Volcanic structure of the crest of the Puna Ridge, Hawaii: Geophysical implications submarine volcanic terrain: Discussion and reply
Discussion ..... *Raymond J. Goldie*
Reply ..... *Daniel J. Fornari and Alexander Malahoff* 703–704

AUGUST

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Taconic and younger deformation and metamorphism in the Croton Falls area, southeastern New York: Summary .... *Patrick W. G. Brock and Douglas G. Mose* 705–707
(Complete article in *Part II,* Card 1, p. 1158–1195)

Ground-water recharge to the aquifers of northern San Luis Valley, Colorado: Summary ..... *David Huntley* 707–709
(Complete article in *Part II,* Cards 1 and 2, p. 1196–1281)

Depositional control of aquifer characteristics in alluvial fans, Fresno County, California: Summary ..... *David Cehrs* 709–711
(Complete article in *Part II,* Card 2, p. 1282–1309)

MAP SUMMARIES

Geology and structure of the southern part of the Tobacco Root Mountains, southwestern Montana: Map summary .... *D. J. Vitaliano, W. S. Cordua, H. R. Burger, T. B. Hanley, D. F. Hess, and F. K. Root* 712–715
(Map summary of Map and Chart Ser. MC-31)

Major tectonic elements and tectonic problems along the line of section from northeastern Oregon to west-central Montana: Map summary ... *Donald W. Hyndman* 715–718
(Map summary of Map and Chart Ser. MC-28C)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Origin of the plutonic mafic rocks of southern Nova Scotia .... *Carlos A. R. de Albuquerque* 719–731

Analysis of rotation of folds during progressive deformation ... *Donald M. Ramsay* 732–738

Deformation and metamorphism in the Hylas zone and adjacent parts of the eastern Piedmont in Virginia .... *Andy R. Bobyarchick and Lynn Glover III* 739–752

Stratigraphic history of the south-central Saharan region ..... *Sunday W. Petters* 753–760

Note on some spatial and temporal variations in ephemeral channel form .... *Helen Rendell and David Alexander* 761–772

The determination of snow avalanche frequency through tree-ring analysis and historical records at Ophir, Colorado .. .. *Paul E. Carrara* 773–780

Glacial and postglacial sediments in Lakes Superior and Michigan .... *Jerry A. Lineback, Carol I. Dell, and David L. Gross* 781–791

Late Cenozoic subduction and continental-margin truncation along the northern Middle America Trench: Discussion and reply
Discussion ..... *Myrl E. Beck, Jr. and Peter W. Plumley*
Reply ..... *D. E. Karig* 792–794

Western margin of Australia: Evolution of a rifted arch system: Discussion and reply
Discussion ..... *H.M.J. Stagg and N. F. Exon*
Reply ..... *J. J. Veevers* 795–798

New K-Ar dates and the late Pliocene to Holocene geomorphic history of the central Rio Grande region, New Mexico: Discussion ..... *Charles E. Stearns* 799–800

SEPTEMBER

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Biogenic silica accumulation in the central equatorial Pacific and its implications for Cenozoic paleoceanography: Summary . . . . . *Margaret Leinen* 801–803
(Complete article in *Part II,* Card 1, p. 1310–1376)

Dolomite and quartz lamellae stress and strain analysis in a multiply-deformed terrane, west-central Vermont: Summary . . . . . *Jeanne C. Detenbeck and Rolfe S. Stanley* 804–805
(Complete article in *Part II,* Cards 1 and 2, p. 1377–1428)

Hydraulic differentiation of heavy minerals, offshore Alabama and Mississippi: Summary . . . . . *S. Edward Drummond and Stephen H. Stow* 806–807
(Complete article in *Part II,* Card 2, p. 1429–1457)

MAP SUMMARY

Tectonic interpretation of a geologic section of the continental margin off San Luis Obispo, the Southern Coast Ranges, and the San Joaquin Valley, California: Cross-section summary . . . *Benjamin M. Page, Holly C. Wagner, David S. McCulloch, Eli A. Silver, and John H. Spotts* 808–812
(Map summary, GSA Map and Chart Ser. MC-28G)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Evolution of the Late Cretaceous forearc basin, northern and central California . . . . . *Raymond V. Ingersoll* 813–826

Effect of volcanic activity on fluvial-deltaic sedimentation in a modern arc-trench gap, southwestern Guatemala . . . . . *W. David Kuenzi, Oscar H. Horst, and Richard V. McGehee* 827–838

The record of Cenozoic volcanism around the Gulf of California . . . . . *Gordon Gastil, Daniel Krummenacher, and John Minch* 839–857

Interpretation of lead-uranium ages of pitchblende deposits in the central Front Range, Colorado . . . . . *George Phair* 858–870

Polymetamorphism in the Silurian-Devonian Goshen Formation of western Massachusetts . . . . . *Richard N. Abbott, Jr.* 871–876

Flow competence in relation to stream channel form and braiding . . . . . *G. H. Cheetham* 877–886

Genesis of the Skagit Gneiss migmatites, Washington, and the distinction between possible mechanisms of migmatization: Discussion and reply
Discussion . . . . . *J. R. Ashworth*
Reply . . . . . *Bruce W. D. Yardley* 887–888

Geologic structure and evolution of the Keta basin, West Africa: Discussion and reply
Discussion . . . . . *David A. Hastings and M. Bacon*
Reply . . . . . *Benjamin N. Akpati* 889–892

Granitic and metamorphic rocks of the Taif area, western Saudi Arabia: Discussion and reply
Discussion . . . . . *W. R. Church*
Reply . . . . *A. O. Nasseef and I. G. Gass* 893–896

OCTOBER

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Paleogene sediment dispersal and paleotectonics in northern California: Summary ..... *William R. Dickinson, Raymond V. Ingersoll, and Stephan A. Graham* 897–898
(Complete article in *Part II,* Card 1, p. 1458–1528)

Petrogenesis of the Mount Albert Ultramafic Massif, Quebec: Summary ..... *Ian D. MacGregor and Asish R. Basu* 898–900
(Complete article in *Part II,* Cards 1 and 2, p. 1529–1627)

Fluid inclusion evidence for Silurian evaporites in southeastern Vermont: Summary ..... *R. A. Rich* 901–902
(Complete article in *Part II,* Card 2, p. 1628–1643)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Early Tertiary "Incaic" tectonism, uplift, and volcanic activity, Andes of central Peru ..... *Donald C. Noble, Edwin H. McKee, and Francois Mégard* 903–907

Intradune flats of the Algodones chain, Imperial Valley, California ..... *Robert P. Sharp* 908–916

Electron micrography of mineral surfaces subject to wind-blast erosion ..... *Marion I. Whitney* 917–934

Ductile deformation zones in Blue Ridge basement rocks and estimation of finite strains ..... *Gautam Mitra* 935–951

Deposition of resedimented sandstone beds in the Pico Formation, Ventura Basin, California, as interpreted from magnetic fabric measurements ..... *Asahiko Taira and Peter A. Scholle* 952–962

Isotopic composition and diagenetic history of carbonate cements in Devonian Golden Spike reef, Alberta, Canada ..... *R. A. Walls, E. W. Mountjoy, and P. Fritz* 963–982

Structural distinction between a metasedimentary cover and an underlying basement in the 600-m.y.-old Pan-African domain of northwestern Nigeria, West Africa: Discussion and reply
Discussion ..... *Howard S. Mullan*
Reply ..... *Norman K. Grant* 983–984

A lower Paleozoic trench-fill sequence, New World Island, Newfoundland: Discussion and reply
Discussion ..... *K. Douglas Nelson and W.S.F. Kidd*
Reply ..... *W. S. McKerrow and L.R.M. Cocks* 985–986

The Colorado Lineament: A middle Precambrian wrench fault system: Discussion and reply
Discussion ..... *M. H. Hickman*
Reply ..... *Lawrence A. Warner* 987–988

Transition analysis of structural sequences: Discussion and reply
Discussion ..... *Göksel Türk*
Reply ..... *M. A. Naylor and N. H. Woodcock* 989–992

NOVEMBER

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Petrography of sand tempers in Pacific Island potsherds: Summary .... *William R. Dickinson and Richard Shutler, Jr.* 993–995
(Complete article in *Part II,* Card 1, p. 1644–1701)
Geologic history and stratigraphy of the Triassic-Jurassic Culpeper-Basin, Virginia: Summary ..... *R. C. Lindholm* 995–997
(Complete article in *Part II,* Card 1, p. 1702–1736)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

Rock structures formed during back-arc basin deformation in the Andes of Tierra del Fuego ..... *Ronald L. Bruhn* 998–1012
Late Holocene faulting and earthquake recurrence in the Reelfoot Lake area, northwestern Tennessee ..... *David P. Russ* 1013–1018
Recurrent faulting in the vicinity of Reelfoot Lake, northwestern Tennessee .... *Mark D. Zoback* 1019–1024
Upper Mesozoic subsea fan deposits in the southern Diablo Range, California: Record of the Sierra Nevada magmatic arc ..... *Charles F. Mansfield* 1025–1046
Myremekite as a marker between preaqueous and postaqueous phase saturation in granite systems ..... *M. J. Hibbard* 1047–1062
Th^{230}-U^{234} dating of pedogenic carbonates in gravelly desert soils of Vidal Valley, southeastern California .. *Teh-Lung Ku, William B. Bull, S. Thomas Freeman, and Kevin G. Knauss* 1063–1073
Pre-Triassic fit and alpine tectonics of continental blocks in the western Mediterranean ..... *R. Bourrouilh and D. S. Gorsline* 1074–1083
Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior: Discussion .. *H. C. Halls* 1084–1086
Diatremes and shock features in Precambrian rocks of the Slate Islands, northeastern Lake Superior: Discussion .... *P. B. Robertson and R.A.F. Grieve* 1087–1088

DECEMBER

ARTICLE SUMMARIES
(COMPLETE ARTICLES IN PART II)

Mineral chemistry of some Franciscan blueschist facies metasedimentary rocks from the Diablo Range, California: Summary ..... *Diane E. Moore and J. G. Liou* 1089–1091
(Complete article in *Part II,* Card 1, p. 1737–1781)

Paleoenvironments of the Cuyahoga and Logan Formations (Mississippian) of central Ohio: Summary ..... *Kennard B. Bork and Robert J. Malcuit* 1091–1094
(Complete article in *Part II,* Cards 1 and 2, p. 1782–1838)

A study of stream braiding: Summary ..... *Le Ba Hong and T.R.H. Davies* 1094–1095
(Complete article in *Part II,* Card 2, p. 1839–1859)

MAP SUMMARY

Geologic map and cross section, eastern Ouachita Mountains, Arkansas: Map summary ..... *George W. Viele* 1096–1099
(Map summary of Map and Chart Ser. MC-28F)

ARTICLES COMPLETE IN THIS ISSUE OF PART I

K-Ar geochronology of Oligocene volcanic rocks, Davis and Barrilla Mountains, Texas ..... *Donnie F. Parker and Fred W. McDowell* 1100–1110

Aerodynamic and vorticity erosion of Mars: Part I. The formation of channels ..... *Marion I. Whitney* 1111–1127

Aerodynamic and vorticity erosion of Mars: Part II. Vortex features, related systems, and some possible global patterns of erosion ..... *Marion I. Whitney* 1128–1143

Modern biogenic gas-generated craters (seafloor "pockmarks") on the Bering Shelf, Alaska ..... *Hans Nelson, D. R. Thor, M. W. Sandstrom, and K. A. Kvenvolden* 1144–1152

A statistical method for relative-age dating of moraines in the Sawatch Range, Colorado ..... *C. Dan Miller* 1153–1164

Black Shell turbidite, Hatteras Abyssal Plain, western Atlantic Ocean ..... *R. Douglas Elmore, Orrin H. Pilkey, William J. Cleary, and H. Allen Curran* 1165–1176

Tectonic origin for Sudbury, Ontario, shatter cones ..... *Michael E. Fleet* 1177–1182

Fluvial adjustments to the spread of tamarisk in the Colorado Plateau region: Discussion and reply
Discussion .... *Benjamin L. Everitt*
Reply ..... *William L. Graf* 1183–1184
